

A full line of solutions for resin transfer molding

Resin transfer molding (RTM) is a closed mold manufacturing process. Finished parts are made by introducing polyester or vinyl ester resins into closed molds containing fiberglass, carbon or other reinforcements.

Whether your process is traditional RTM, Light RTM, Vacuum Infusion Process (VIP), Closed Cavity Bag Molding (CCBM), or other similar process, GlasCraft offers a complete line of RTM systems to fit your application.

GlasCraft RTM Systems provide control at low pressure – the key to successful Light RTM injection

- Engineered for low-pressure injection of polyester and vinyl ester resins
- Accu-Pressure sensor monitors and controls pressure
- Entry-level to automated, high-volume production models are available

Typical applications:

- Marine and watercraft
- Pool and spa
- Bathware
- Consumer products
- Automotive panels and parts
- Aircraft components

Touch-screen PLC

Programmable machine functions – from injection volume to catalyst ratio (depending on options)

Superior recirculation

- Allows resin and catalyst to cycle to the dispense head and back to the containers, unmixed
- Keeps pigments and fillers suspended in the resin
- Allows line to be de-gassed without wasting material

Spartan Dispense Head

Provides excellent mix of resin and catalyst, and trouble-free injection as well

Positive Feed Catalyst pump

Allows for infinite adjustment of catalyst percentage – no tools required

Air Purge/Solvent Flush

For quick, efficient maintenance cleaning

Accu-Pressure Sensor

- Regulates, monitors and controls injection pressure
- Stops material from dispensing if injection pressures go above the user set point
- Prevents molds from becoming over-pressured

Aerospace Materials Handbook Sam Zhang, Dongliang Zhao, 2016-04-19 Whether an airplane or a space shuttle a flying machine requires advanced materials to provide a strong lightweight body and a powerful engine that functions at high temperature The Aerospace Materials Handbook examines these materials covering traditional superalloys as well as more recently developed light alloys Capturing state of the art developments in materials research for aeronautical and aerospace applications this book provides a timely reference for both newcomers and veteran researchers in the field The chapters address developments in bulk materials coatings traditional materials and new materials Beginning with an overview of superalloys including nickel nickel iron and cobalt based superalloys the text covers machining laser cladding and alloying corrosion performance high temperature oxidation thermal spraying and nanostructured coatings It also includes four categories of composites used in aerospace metal matrix polymer carbon nanotube reinforced polymer and self healing composites The text describes preparation processing and fatigue of lightweight magnesium alloys as well as an exciting new class of materials aerogels This book brings readers to the cutting edge of research in materials for aerospace and aeronautics It provides an entry point into this field and presents details to stimulate future research This unique up to date resource offers knowledge to enable practitioners to develop faster more efficient and more reliable air and spacecraft

Handbook of Composites S.T. Peters, 2013-11-27 Today fiber reinforced composites are in use properties of different component fiber in a variety of structures ranging from space matrix filler materials craft and aircraft to buildings and bridges manufacturing techniques This wide use of composites has been facilitated by the introduction of new materials testing improvements in manufacturing processes mechanically fastened and bonded joints and developments of new analytical and test repair ing methods Unfortunately information on damage tolerance these topics is scattered in journal articles in environmental effects conference and symposium proceedings in and disposal health safety reuse workshop notes and in government and com applications in many reports This proliferation of the source aircraft and spacecraft material coupled with the fact that some of land transportation the relevant publications are hard to find or marine environments are restricted makes it difficult to identify and biotechnology obtain the up to date knowledge needed to construction and infrastructure utilize composites to their full advantage sporting goods This book intends to overcome these difficulties Each chapter written by a recognized expert contributes by presenting in a single volume is self contained and contains many of the many of the recent advances in the field of state of the art techniques required for practical composite materials The main focus of this practical applications of composites Monthly Catalog of United States Government Publications , 1999
