

Summer Math Packets Rising 9th Grade Algebra 1

Dear WCCS Students,

This is the summer math packet if you are entering 9th grade Algebra 1 next year. There are 106 questions in total which you can spread out over the summer by doing 12-15 questions per week. Unless you register within two weeks of the beginning of the school year, you are responsible for these concepts before school starts in fall. The first test grade of the quarter will include 50% completion grade for the summer packet and 50% from a skills assessment given in class on these topics.

This packet will be collected from each student the first day back and adequate work must be shown for problems as appropriate. Five points will be deducted for each day the assignment is not turned in to the math teacher.

If you have trouble working the problems, look at online resources, ask a friend or parent for help. If you are still having trouble please email me by July 25th. I can meet for help in early August before school starts to go over select problems. Problems should be familiar and cover basic skills that will help you achieve success in Algebra 1. Of course, you may need to refresh your memory as your work through the problems. I hope you have a wonderful summer!
