**Resources in Education** ,1994-08      **Assessment of Reading in International Studies** Jenny Lenkeit,Knut Schwippert,2020-05-21 This book brings together contributions from different scholarly contexts that address a diverse range of focused topics as well as empirical and conceptual perspectives on research with international studies Some chapters focus on technical aspects exploring opportunities for drawing causal inferences from the data and investigating biases originating in distributional scale properties Others are of a more conceptual nature addressing changes in the relevance of socio economic indicators across time and countries examining the exposure of mother tongue and English instruction on performance and investigating the effects of test construction on gender difference The discussion takes a much needed meta perspective on the usefulness of international large scale assessments for educational research and allows reflection upon possibilities and opportunities for their improvement This book was originally published as a special issue of Assessment in Education      **African Books in Print** ,1978      *The Economic and Technical Viability of Various Scales of Building Materials Production* ,1989      **Children's Books in Print, 2007** ,2006      Safe Spaces Cornelia Roux,2012-10-26 This book examines the crucial issues affecting Human Rights Education in contexts of culture religious and societal diversity It exhibits an impressive scholarly achievement capturing and combining the insights of both established academics and emerging researchers Each author succeeds in distilling the knowledge of their particular fields of interest as well as conveying the essence of their intuitive understanding and the richness of the context This book considers a variety of connected content and methodological issues in three major sections Philosophical and policy perspectives Gender discourses diverse perspectives and Discourses on narratives as safe spaces The Edition is further strengthened by allowing international reviewers the opportunity of engaging with the contributors in the Introduction and Conclusion an innovative departure from conventional formats and which will provide a global perspective to the readers The focus of the various chapters succeeds in establishing both a foundation and platform for dialogue surrounding human rights and human rights education in modern policy and governance Aptly named Safe Spaces the Edition offers in depth and credible safe nuances spaces in terms of the somewhat reified concept of human rights at a time when human rights remains a highly topical and contested international issue As such the book imparts an immense scope of theoretical and empirical perspectives reflected by the distinguished intellectuals who navigate the terrain of their respective disciplines with profound erudition This book represents a collaborative effort of immeasurable value This exemplary edition is both timeless and will prove timeless

Jansen,2019-11-05 This volume brings together many of South Africa s leading scholars of education and covers the full range of South African schooling

from financing and policy reform to in depth discussions of literacy numeracy teacher development and curriculum change The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with Are there different and preferential equilibria we have not yet thought of or explored and if so what are they In practical terms how does one get to a more equitable distribution of teachers resources and learning outcomes While decidedly local these questions resonate throughout the developing world South Africa today is the most unequal country in the world The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth This is the largest 90 10 gap in the world and one that is reflected in the schooling system Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard work and determination but instead by the colour of their skin the province of their birth and the wealth of their parents Looking back on almost three decades of democracy in South Africa it is this stubbornness of inequality and its patterns of persistence that demands explanation justification and analysis This is a landmark book on basic education in South Africa an essential volume for those interested in learning outcomes and their inequality in South Africa The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race class and place The book brings together the wealth of decades of research output from top quality researchers to explore what has improved what has not and why Prof Lant Pritchett Harvard University There is much wisdom in this collection from many of the best education analysts in South Africa No surprise that they conclude that without a large and sustained expansion in well trained teachers early childhood education and adequate school resources South Africa will continue to sacrifice its people s future to maintaining the privileges of the few Prof Martin Carnoy Stanford University Altogether one can derive from this very valuable volume if not an exact blueprint for the future then certainly at least a crucial and evidence based itinerary for the next few steps Dr Luis Crouch RTI
