Intensional First-Order Logic Zoran Majkic, 2022-09-06 This book introduces the properties of conservative extensions of First Order Logic FOL to new Intensional First Order Logic IFOL This extension allows for intensional semantics to be used for concepts thus affording new and more intelligent IT systems Insofar as it is conservative it preserves software applications and constitutes a fundamental advance relative to the current RDB databases Big Data with NewSQL Constraint databases P2P systems and Semantic Web applications Moreover the many valued version of IFOL can support the AI applications based on many valued logics

Worked Problems in Heat, Thermodynamics and Kinetic Theory for Physics Students L. Pincherle, 2013-10-22 Worked Problems in Heat Thermodynamics and Kinetic Theory for Physics Students is a complementary to textbooks in physics This book is a collection of exercise problems that have been part of tutorial classes in heat and thermodynamics at the University of London This collection of exercise problems with answers that are fully worked out deals with various topics This book poses problems covering the definition of temperature such as calculating the assigned value of the temperature of boiling water under specific conditions This text also gives example of problems dealing with the first law of thermodynamics and with the definition of thermal capacities Some practical questions such as problems dealing with thermal engines are presented This book then discusses problems using the energy equation as well as asking the student to derive a general equation of state of a material satisfying a specific condition This text challenges the student to use a T S diagram to calculate the efficiency of a reversible cycle under certain conditions Several other problems concern the Joule and Joule Kelvin effects low temperature physics and heat conduction This review material can be helpful for students of physics thermodynamics and related subjects It can also be used by teachers of physics

Algebraic and Logic Programming Helene Kirchner, Giorgio Levi, 1992-08-19 This volume contains the proceedings of the Third International Conference on Algebraic and Logic Programming held in Pisa Italy September 2 4 1992 Like the two previous conferences in Germany in 1988 and France in 1990 the third conference aims at strengthening the connections between algebraic techniques and logic

programming On the one hand logic programming has been very successful during the last decades and more and more systems compete in enhancing its expressive power On the other hand concepts like functions equality theory and modularity are particularly well handled in an algebraic framework Common foundations of both approaches have recently been developed and this conference is a forum for people from both areas to exchange ideas results and experiences The book covers the following topics semantics of algebraic and logic programming integration of functional and logic programming term rewriting narrowing and resolution constraint logic programming and theorem proving concurrent features in algebraic and logic programming languages and implementation issues
