Abraham, 2014-12-16 This book is about the mistakes and errors that the author experienced and witnessed in Europe during World War II The author has had feelings of sorrow about the soldiers who died needlessly and the possibility that the war might have ended sooner The book contains both what actually happened and what might have happened It is beyond belief that a fighting Third United States Army under the command of Patton would be stripped of food fuel and supplies to stop him from fighting The book then moves to the post World War II Cold War and how it might have been different had General Patton been allowed to fight An interview with a doctor who came here from Yugoslavia provides details about how life was there The few veterans who were there and still living will recall many of the events in the book The book is written in the memory of the soldiers who died needlessly or were wounded because of the failure of command Also this book is meant to be a lasting tribute to a man who was the true warrior the best general we have ever produced and the general who the Germans feared the most General George S Patton Jr Commander of the Third United States Army The Problem of Political Foundations in Carl Schmitt and Emmanuel Levinas Gavin Rae, 2016-09-17 In this book Gavin Rae analyses the foundations of political life by undertaking a critical comparative analysis of the political theologies of Carl Schmitt and Emmanuel Levinas In so doing Rae contributes to key debates in contemporary political philosophy specifically those relating to the nature of and the relationship between the theological the political and the ethical as well as those questioning the existence of ahistoric metaphysical ontological and epistemological foundations While the theological is often associated with belief in a fixed foundation such as God or the truth of a religion Rae identifies another sense rooted in epistemology On this understanding the ontological limitations of human cognition mean that ultimately human truth is based in faith and so can never be certain The argument developed suggests that Levinas conception of the political is grounded in theology in the sense of religion

particularly the revelations of Judaism For this reason Levinas claims that the political decision is based on how to implement a prior religiously inspired norm justice Schmitt in contrast develops a conception of the political rooted in epistemic faith to claim that the political decision is normless While sympathetic to Schmitt s conception of theology and its relationship to the political Rae concludes by arguing that the emphasis Levinas places on responsibility is crucial to understanding the implications of this The continuing relevance of Schmitt s and Levinas political theologies is that they teach us that while the political decision is ultimately normless we bear an infinite responsibility for the consequences of this normless decision

The Political Vocation of Philosophy Donatella Di Cesare,2021-05-27 It is time for philosophy to return to the city In today s crisis ridden world of globalised capitalism increasingly closed in on itself it may seem harder than ever to think of ways out Philosophy runs the risk of becoming the handmaiden of science and of a hollowed out democracy Donatella Di Cesare calls on philosophy instead to return to the political fray and to the city the global polis from which it was banished after the death of Socrates Suggesting a radical existentialism and a new anarchism Di Cesare shows that Western philosophy has been characterised by a political vocation ever since its origins in ancient Greece and argues that the separation of philosophy from its political roots robs it of its most valuable and enlightening potential But critique and dissent are no longer enough Mindful of a defeated exile and an inner emigration philosophers should return to politics and forge an alliance with the poor and the downtrodden This passionate defence of the political relevance of philosophy and its radical potential in our globalised world will be of great interest to students and scholars of philosophy and to a wide general readership

The Political Sociology of Emotions Nicolas Demertzis,2020-06-01 The Political Sociology of Emotions articulates the political sociology of emotions as a sub field of emotions sociology in relation to cognate disciplines and sub disciplines Far from reducing politics to affectivity the political sociology of emotions is coterminous with political sociology itself plus the emotive angle added in the investigation of its traditional and more recent areas of research The worldwide predominance of affective anti politics e g the securitization of immigration policies reactionism terrorism competitive authoritarianism nationalism and populism etc makes the political sociology of emotions increasingly necessary in making the prospects of democracy and republicanism in the twenty first century more intelligible Through a weak constructionist theoretical perspective the book shows the utility of this new sub field by addressing two central themes trauma and resentment Trauma is considered as a key cultural political phenomenon of our times evoking both negative and positive emotions resentment is a pertaining individual and collective political emotion allied to insecurities and moral injuries In tandem they constitute fundamental experiences of late modern times The value of the political sociology of emotions is revealed in the analysis of civil wars cultural traumas the politics of pity the suffering of distant others in the media populism and national identities on both sides of the Atlantic

The Self, Ethics & Human Rights Joseph Indaimo, 2015-02-11 This book explores how the notion of human identity informs the ethical goal of justice in human rights Within the modern discourse of human rights the issue of identity has been largely neglected However within this discourse lies a conceptualisation of identity that was derived from a particular liberal philosophy about the true nature of the isolated self determining and rational individual Rights are thus conceived as something that are owned by each independent self and that guarantee the exercise of its autonomy Critically engaging this subject of rights this book considers how recent shifts in the concept of identity and more specifically the critical humanist notion of the other provides a basis for re imagining the foundation of contemporary human rights Drawing on the work of Jacques Lacan and Emmanuel Levinas an inter subjectivity between self and other always already marks human identity with an ethical openness And this book argues it is in the shift away from the human self as a sovereign individual that human rights have come to reflect a self identity that is grounded in the potential of an irreducible concern for the other
