Financial Crisis, Austerity, and Electoral Politics Pedro Magalhães, 2017-10-02 This book examines the domestic electoral consequences of the economic and financial crisis in Europe particularly in those countries where the crisis manifested itself more devastatingly the Southern European countries of Greece Italy Portugal and Spain as well as Iceland and Ireland On the surface the electoral consequences of the crisis seem largely similar having resulted in these countries in large electoral losses for incumbents as the most elementary versions of economic voting theory would have us

expect However behind this fundamental similarity important differences emerge Whilst in some cases on the basis of post election surveys it is possible to see that the crisis elections followed a previous pattern of performance oriented voters with no major changes either in known predictors of electoral choices or in basic party system properties other elections brought the emergence of new parties new issues and cleavages altering patterns of political competition By examining these different outcomes by comparing the crisis elections with previous ones this book takes into account their timing relative to different stages of crisis It also scrutinises party strategies and campaign dynamics particularly as governments attempted and sometimes succeeded in framing events and proposals so as to apportion responsibility for economic outcomes This book was originally published as a special issue of the Journal of Elections Public Opinion and Parties

Social Mobility in Developing Countries Vegard Iversen,Anirudh Krishna,Kunal Sen,2021-12-17 Social mobility is the hope of economic development and the mantra of a good society There are disagreements about what constitutes social mobility but there is broad agreement that people should have roughly equal chances of success regardless of their economic status at birth Concerns about rising inequality have engendered a renewed interest in social mobility especially in the developing world However efforts to construct the databases and meet the standards required for conventional analyses of social mobility are at a preliminary stage and need to be complemented by innovative conceptual and methodological advances If forms of mobility have slowed in the West then we might be entering an age of rigid stratification with defined boundaries between the always haves and the never haves which does not augur well for social stability Social mobility research is ongoing with substantive findings in different disciplines typically with researchers in isolation from each other A key contribution of this book is the pulling together of the emerging streams of knowledge Generating policy relevant knowledge is a principal concern Three basic questions frame the study of diverse aspects of social mobility in the book How to assess the extent of social mobility in a given development context when the datasets by conventional measurement techniques are unavailable How to identify drivers and inhibitors of social mobility in particular developing country contexts How to acquire the knowledge required to design interventions to raise social mobility either by increasing upward mobility or by lowering downward mobility

Energy, Bio Fuels and Development Edmund Amann, Werner Baer, Don Coes, 2011-03-07 This collection examines the important and topical issue of the economic social and environmental implications of concerted attempts to diversify energy sources away from fossil fuels The book expertly examines this issue by focussing on the contrasting experiences of two major economies one developed and the other a rapidly expanding emerging market Energy Bio Fuels and Development evaluates the experience of Brazil with elements of that of the US highlighted for the purpose of comparison A key area of concern surrounds the causes and consequences of the contrasting routes to biofuel production represented by sugar cane in Brazil and corn in the US The book also places the recent biofuels drive in perspective by discussing the broader energy policy context The book shows the complexity and interdependence of the issues involved in moving a society reliant on non renewable energy sources to one based on alternative sources of energy The key conclusion to emerge is that Brazil in pursuing a flexible mix of fossil fuels and bio fuels has greatly diminished its exposure to exogenous energy shocks The US experience in particular its development of corn based ethanol has been more problematic though by no means without successes It is argued that bio fuels should not be seen as a panacea There are clear limits to the efficiency and cost effectiveness of current biofuel production technologies while there remain concerns surrounding potentially adverse effects on food production and rural livelihoods This book should be an excellent resource for students focussing on economic development particularly in the areas of energy biofuels rural development and food supply

Water Resources Management in the People's Republic of China Xuetao Sun, Robert Speed, Dajun Shen, 2013-09-13 Chinese water resource managers face a challenge that is both immense and unique They must balance limited water supplies against the needs of the world s largest population demands for rapid economic growth with calls for improved environmental management and the desire for a market based approach to the allocation of water with a history of State ownership and strict government control of all resources In China changes are occurring in water resources management that are representative of many of the fundamental changes occurring within Chinese society on issues such as property rights community participation improved environmental management and the shift towards market based decision making This

book describes the development of a water rights system in the People's Republic of China. It covers different aspects of water resources management in China including water planning, the provision of environmental flows, urban water management and irrigation district management and examines how these are being addressed through a rights-based approach. The book includes several detailed examples of the Chinese application of water rights as they address the diverse challenges of different basins across China. This book previously appeared as a special issue of the International Journal of Water Resources Development.

The Top Books of the Year October November 2008 Economics Paper 2 Ms The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of popular books, exploring the engaging narratives that have enthralled audiences this year. October November 2008 Economics Paper 2 Ms : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. October November 2008 Economics Paper 2 Ms : Taylor Jenkins Reid's "The Seven Husbands of Evelyn Hugo" This intriguing historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reid's compelling storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens' "Where the Crawdads Sing" This evocative coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, entrancing readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is an exceptional and suspenseful novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
