

# Oh Deer

## Game

Divide students into two groups. One group will be the deer and the other group will represent the environment. Each group stands on one end of the field or gym.

The students in the environment group each choose to be food water or shelter. It does not matter who chooses what. If they are water they will put their hand over their mouth, food will put their hand on their stomach and shelter will put their hands over their head. The deer also choose a symbol. This represents what they are looking for.

When the teacher says "Oh Deer", both groups will turn to face each other. The deer must run across the field or gym to find whatever symbol they are looking for. If they do not find it they become part of the environment. If they do find it they link arms with the other person and that person becomes a deer. They run back to the deer side.

Play 8-10 rounds. Record the deer in each round. Later, make a line graph to represent the deer population in each round. Discuss the data to show students how a population maintains balance. Use the True or False questions to informally assess what students learned from the activity.
