Early Military Rifles Balázs Németh, 2020-11-26 The conduct of combat operations in open order during the 18th and 19th centuries required an improved firearm with more accuracy than the standard issue smoothbore infantry musket. Consequently the appearance of a new type of regular light infantry soldier and an innovative military firearm the rifle marked a new age in the history of warfare. During the 18th century both Austria and Prussia fielded light troops armed with rifled firearms while conflicts in North America involved the deadly long rifle and the innovative Ferguson breech loader Rifle. Armed specialists also fought for several nations during the Napoleonic Wars. However it was the decades after 1815 that saw the appearance of successful rifled percussion firearms paving the way for the widespread issue of rifled weapons. This development was accelerated by the Prussian adoption of the Dreyse needle gun in 1848 and in 1849 the French Mini rifle was the first successful conical ball rifle concept to be issued to regular troops in large numbers. Illustrated throughout with stunning full colour artwork this study charts the development, combat use, influence and legacy of rifled firearms in a host of conflicts from the War of the Austrian Succession of 1740-48 to the Mexican American War of 1846-48. *Western Construction*, 1965 Wisconsin Wood Marketing Bulletin, 1990 **The Cultivator & Country Gentleman**, 1872
