Police Organization and Training M.R. Habermeld, Curtis A. Clarke, Dale L. Sheehan, 2011-10-07 Criminal enterprises are growing in sophistication Terrorism is an ongoing security threat The general public is more knowledgeable about legal matters These

developments among others necessitate new methods in police work and in training new recruits and in service officers. Given these challenges, improvements in training are a vital means of both staying ahead of lawbreakers and delivering the most effective services to the community. Police Organization and Training surveys innovations in law enforcement training in its evolution from military style models toward continuing professional development, improved investigation methods and overall best practices. International dispatches by training practitioners, academics and other experts from the US, the UK, Canada, Germany, Hong Kong and elsewhere emphasize blended education methods, competency building, curricula, program and policy development and leadership concepts. These emerging paradigms and technologies coupled with a clear focus on ethical issues provide a lucid picture of the future of police training in both educational and law enforcement contexts. In addition, the book's training templates are not only instructive but also adaptable to different locales. Featured in the coverage: Simulation technology as a training tool; the Investigation Skill Education Program and the Professionalizing Investigation Program; redesigning specialized advanced criminal investigation and training; a situation oriented approach to addressing potentially dangerous situations; developments in United Nations peacekeeping training and combating modern piracy. Police Organization and Training is a key resource for researchers and policymakers in comparative criminal justice, police and public administration and police training academies. It also has considerable utility as a classroom text in courses on policing and police administration. Includes a forward by Ronald K. Noble, Secretary General of INTERPOL. Policing Police Violence Hans van Mastrigt,Niels Uildriks,2023-12-04 For many years both police violence and the complaints procedures have been important topics for debate in Britain and elsewhere This book aims to provide a contribution to this debate by analysing the way in which police violence at present is and should be policed On the basis of a case study in Glasgow the authors examine the phenomenon of police violence and the occupational reality in which it can be most adequately controlled The present type of British complaints system was found to have little to offer to the victims of such incidents and to be even counterproductive as a mechanism of control of police behaviour This book discusses the main structural amendments which would enable the complaints procedure to provide a more adequate response It is contended that the police themselves can and should play a major role in the control of police violence and that they should have both the responsibility and opportunity for rectifying what went amiss The implications of his study extend beyond the immediate Glaswegian Scottish and even British context and are of wider interest to all those who are concerned with the issues and problems of police violence policing police misconduct and police accountability in general
