K.S. Madhavan¹, Rajesh Komath²

Abstract

Unravelling historical and social theoretical trends, it examines broadly an anti-caste imaginary articulating notions of equality and addressing various events, personnel interventions, policies and ideologies made discursive politics in Kerala. As ideologies and its consequent effects upon society are political, the article substantially makes comments and interprets the Dalit-Bahujan world grounded on the lived experiences of Dalits in Kerala. The article brings forth discourses of social movements, production of Dalit icons, critical narratives on untouchability and communist positions about caste. But, a new imagination, academic and aesthetical engagements of Dalit-Bahujans in the form of the production of Dalit art and literature informs new articulation of Dalit politics in Kerala.

Introduction

A particular socio-economic and cultural system in sub-continental India has developed a systemic social world of distinctive lives based on life activities and social division of labourers. These everyday social divisions in the historical past have been caste-based structural inequalities that led to the complex social formation process and emergence of multiple forms of political structure. This explicates that forms of power relations were conditioned by ranking social groups in a hierarchical order. The top of the ladder is always endowed with reverence and all the layers below have been placed according

Civil Society in South Asia David Taylor,Heewon Kim,2022-08-22 Are new ideas needed to disentangle the uses and abuses of the idea of civil society both in South Asia and beyond This book seeks to explore this question by reviewing the debate on civil society mainly in India but also in Pakistan Civil society is a term that has a rich history in European political and social thought since the 17th century Yet it has also become shorthand either for groups who place themselves in opposition to state elites or for non governmental organizations that initiate often in partnership with international agencies programmes of economic and social development that to a greater or lesser extent are distanced from the state The purpose of this collection of essays initially presented at a seminar in 2018 in Hyderabad in South India is to explore these disconnects and to see if concepts of civil society can be developed that go with the grain of South Asia s political and

historical experience Some of the chapters in this edited volume focus specifically on theoretical dimensions while others take case studies from India and Pakistan The chapters in this book were originally published as a special issue of the Journal of Civil Society

The Future Conditional Eric S. Henry, 2021-05-15 In *The Future Conditional* Eric S Henry brings twelve years of expertise and research to offer a nuanced discussion of the globalization of the English language and the widespread effects it has had on Shenyang the capital and largest city of China s northeast Liaoning Province Adopting an ethnographic and linguistic perspective Henry considers the personal connotations that English has for Chinese people beyond its role in the education system Through research on how English is spoken taught and studied in China Henry considers what the language itself means to Chinese speakers How and why he asks has English become so deeply fascinating in contemporary China simultaneously existing as a source of desire and anxiety The answer he suggests is that English speaking Chinese consider themselves distinctly separate from those who do not speak the language the result of a cultural assumption that speaking English makes a person modern Seeing language as a study that goes beyond the classroom *The Future Conditional* assesses the emerging viewpoint that for many citizens speaking English in China has become a cultural need and more immediately a realization of one s future

Echoes in the Classroom: Colonial Shadows in India's Modern Education KHRITISH SWARGIARY, 2025-05-16 The roots of any education system lie deep within the soil of its history In India these roots are entangled with the legacies of colonial rule which have left behind not only administrative and linguistic frameworks but also epistemological frameworks that is ideas about what counts as knowledge how it is taught and to whom This book *Echoes in the Classroom: Colonial Shadows in India s Modern Education* is an outcome of a long standing inquiry into how British colonialism continues to shape inform and sometimes distort the contours of education in postcolonial India As a student I often encountered a curriculum that seemed strangely distant from the world I inhabited both historically and culturally As a teacher and later as a researcher I began to see that this was not a matter of oversight but of design The colonial project after all aimed not merely to govern bodies but to govern minds Education was never neutral it was and continues to be a potent tool of social ordering control and stratification In writing this book I have drawn upon a diverse range of sources from historical records and education policy documents to contemporary interviews with teachers students activists and policy makers I have explored how English language dominance bureaucratic models of schooling colonial era hierarchies of knowledge and even the architecture of elite schools reflect a persistent colonial hangover But more importantly I have tried to trace how these legacies operate today in the age of digital learning artificial intelligence and globalized education platforms This work is not an attempt to romanticize pre colonial forms of knowledge nor is it a rejection of modernity or technological progress Rather it is a call to interrogate the unexamined assumptions that

underlie our systems of teaching and learning It is a call to ask difficult but necessary questions Why do we continue to valorize Western knowledge systems while marginalizing indigenous ones Why is English still the ticket to upward mobility in a country as linguistically rich as India Why do our school structures still reflect the logic of order discipline and hierarchy inherited from colonial rule I have organized this book in four parts The first traces the origins of British educational policy in India laying bare its ideological underpinnings The second examines the continuities that persisted after independence from Macaulay to NEP 2020 The third turns a critical eye toward the rise of EdTech and the algorithmic reproduction of inequality in digital classrooms The final section imagines possibilities for decolonizing education from curriculum to pedagogy from language to platform This book is written for a wide audience scholars educators students activists and anyone concerned with the future of education in India It is my hope that it provokes thought raises questions and perhaps opens space for transformation The colonial classroom has not yet been dismantled but through awareness critique and collective action we may yet reimagine it Khritish Swargiary 2025 **Globalization Development and Social Justice** Ann El
