**6-3 Conditions for Parallelograms**

You can use the following conditions to determine whether a quadrilateral such as  $PQRS$  is a parallelogram.

Conditions for Parallelograms			
			
$\overline{QR} \parallel \overline{PS}$ $\overline{PQ} \parallel \overline{RS}$		$\overline{QR} \cong \overline{PS}$ $\overline{PQ} \cong \overline{RS}$	
<p>If one pair of opposite sides is <math>\parallel</math> and <math>\cong</math>, then <math>PQRS</math> is a parallelogram.</p>		<p>If both pairs of opposite sides are <math>\cong</math>, then <math>PQRS</math> is a parallelogram.</p>	
			
$\angle P \cong \angle R$ $\angle Q \cong \angle S$		$\overline{PT} \cong \overline{RT}$ $\overline{QT} \cong \overline{ST}$	
<p>If both pairs of opposite angles are <math>\cong</math>, then <math>PQRS</math> is a parallelogram.</p>		<p>If the diagonals bisect each other, then <math>PQRS</math> is a parallelogram.</p>	

A quadrilateral is also a parallelogram if one of the angles is supplementary to both of its consecutive angles.

$65^\circ + 115^\circ = 180^\circ$ , so  $\angle A$  is supplementary to  $\angle B$  and  $\angle D$ .

Therefore,  $ABCD$  is a parallelogram.

Show that each quadrilateral is a parallelogram for the given values. Explain.

discussed As a result many students misuse and otherwise do not understand the role of definition in mathematics We have chosen in this monograph to examine a bit of mathematics for its definitions the quadrilaterals We do so because there is some disagreement in the definitions and consequently in the ways in which quadrilaterals are classified and relate to each other The issues underlying these differences have engaged students teachers mathematics educators and mathematicians There have been several articles and a number of essays on the definitions and classification of quadrilaterals But primarily we chose this specific area of definition in mathematics because it demonstrates how broad mathematical issues revolving around definitions become reflected in curricular materials While we were undertaking this research we found that the area of quadrilaterals supplied grist for broader and richer discussions than we had first anticipated The intended audience includes curriculum developers researchers teachers teacher trainers and anyone interested in language and its use
