Ansgar Thiel,Andreas Michael Nieß,Gorden Sudeck,Christoph Thaiss,2022-12-06 Bioprospecting of Microbial Diversity Pradeep Verma,Maulin P. Shah,2022-02-01 Bioprospecting of Microbial Diversity Challenges and Applications in Biochemical Industry Agriculture and Environment Protection gives a detailed insight into the utilization of microorganisms or microorganism based bioactive compounds for the development of sustainable approaches covering recent advances and challenges in the production and recovery of bioactive compounds such as enzymes biopesticides biofertilizers biosensors therapeutics nutraceutical and pharmaceutical products The challenges associated with the different approaches of microbial bioprospecting along with possible solutions to overcome these limitations are addressed Further the application of microbe

based products in the area of environmental pollution control and developing greener technologies are discussed Providing valuable insight into the basics of microbial prospecting the book covers established knowledge as well as genomic based technological advancements to offer a better understanding of its application to various industries promoting the commercialization of microbial derived bioactive compounds and their application in biochemical industries agriculture and environmental protection studies Describes the advanced techniques available for microbial bioprospecting for large scale industrial production of bioactive compounds Presents recent advances and challenges for the application of microbe based products in agriculture and environment pollution control Provides knowledge of microbial production of bioenergy and high value compounds such as nutraceuticals and pharmaceuticals **Aquananotechnology** David E. Reisner,T.

Pradeep,2014-09-24 The world s fresh water supplies are dwindling rapidly even wastewater is now considered an asset By 2025 most of the world s population will be facing serious water stresses and shortages Aquananotechnology Global Prospects breaks new ground with its informative and innovative introduction of the application of nanotechnology to the remediation of contaminated water for drinking and industrial use It provides a comprehensive overview from a global perspective of the latest research and developments in the use of nanotechnology for water purification and desalination methods The book also covers approaches to remediation such as high surface area nanoscale media for adsorption of toxic species UV treatment of pathogens and regeneration of saturated media with applications in municipal water supplies produced water from fracking ballast water and more It also discusses membranes desalination sensing engineered polymers magnetic nanomaterials electrospun nanofibers photocatalysis endocrine disruptors and Al₁₃ clusters It explores physics based phenomena such as subcritical water and cavitation induced sonoluminescence and fog harvesting With contributions from experts in developed and developing countries including those with severe contamination such as China India and Pakistan the book s content spans a wide range of the subject areas that fall under the aquananotechnology banner either squarely or tangentially The book strongly emphasizes sorption media with broad application to a myriad of contaminants both geogenic and anthropogenic keeping in mind that it is not enough for water to be potable it must also be palatable
