Rice Green Revolution in Sub-Saharan Africa Keijiro Otsuka, Yukichi Mano, Kazushi Takahashi, 2023-03-01 This open access book seeks effective strategy to realize a rice Green Revolution in sub Saharan Africa based on more than ten years of research team s inquiries into determinants and consequences of new technology adoption in rice farming in seven countries in this region Rigorous statistical analyses are carried out by using valuable household data of rice farmers The book is actually sequel to the two earlier books on the same subject published by Springer and edited by K Otsuka and D F Larson An African Green Revolution published in 2013 and In Pursuit of an African Green Revolution in 2016 The main message of the first book was that rice is the most promising cereal crop in SSA because of the high transferability of Asian rice technology whereas that of the second book was that rice cultivation training programs are effective in significantly increasing rice yield in SSA This third book has wider coverage in terms of topics study periods and study sites It continues to show the significant impacts of rice cultivation training on productivity and newly demonstrates the high sustainability of the productivity impact of the training and the existence of spillover effects from trainees to other farmers by using panel data We newly assess the important role of mechanization in intensification of rice farming high returns to large scale irrigation schemes and the critical role of rice millers in improving the quality of milled rice Based on these studies this book provides clear pathways toward full fledged Green Revolution in rice farming in sub Saharan Africa

Weaving the Camp Hannah Schmidt, 2023-08-14 This book offers a socio spatial analysis of a refugee camp in southwestern Uganda Based on qualitative research with a multi method approach the author shows how refugees are central actors in the operation and becoming of a camp Not only do they crucially contribute to its social micro economic and material realization but they also incrementally rearrange the camp space by acts of constant adaptation in order to make it work for its inhabitants By means of social interaction infrastructuring translation movement and material improvisation they navigate daily life in the semi constricted and highly precarious space of the refugee protection regime and carve out its social and material landscape Thus this study challenges static understandings of camps and restricted conditions and puts

forward theoretical implications for the rethinking and reassessment of agency in such contexts by calling for closer attention to ordinary practices *World conference on early Childhood Care and Education* Opoku, Maxwell

Peprah, Pearson, Emma, UNESCO, 2023-11-22 **Our Social World** Jeanne H. Ballantine, Kathleen Odell Korgen, 2022-09-30

The Eighth Edition of *Our Social World* Introduction to Sociology inspires students to develop their sociological imaginations to see the world and personal events from a new perspective and to confront sociological issues on a day to day basis The text is organized around the Social World model a conceptual framework that demonstrates the relationships among individuals the micro level organizations institutions and subcultures the meso level and societies and global structures the macro level The consistent application of the Social World Model across chapters represented in a visual diagram in the chapter openers helps students develop the practice of using three levels of analysis and to view sociology as an integrated whole rather than a set of disparate subjects This title is accompanied by a complete teaching and learning package in SAGE Vantage an intuitive learning platform that integrates quality SAGE textbook content with assignable multimedia activities and auto graded assessments to drive student engagement and ensure accountability Unparalleled in its ease of use and built for dynamic teaching and learning Vantage offers customizable LMS integration and best in class support *Getting Down to Earth* World Bank, 2022-01-14 Outdoor air pollution accounts for an estimated 4.2 million deaths worldwide the majority of which are caused by exposure to fine particulate matter or PM_{2.5} air pollution Most of these deaths occur in low and middle income countries LMICs Reducing PM_{2.5} air pollution is thus crucial for improving public health outcomes in those countries Measuring and reducing the health impacts of PM_{2.5} is especially challenging in many LMICs because ground level air quality monitoring networks are typically nonexistent Where they are in place they are often not properly operated and maintained and are thus unreliable Limited local expertise in air quality measurement presents additional challenges These shortcomings can undermine a country's ability to design and implement effective policies to improve outdoor air quality Satellite technology has been used successfully for measuring air quality in high income countries where operation of ground level air quality monitoring networks is well established However *Getting Down to Earth: Are Satellites Reliable for Measuring Air Pollutants That Cause Mortality in Low and Middle Income Countries* investigates the performance of satellites in LMICs for predicting outdoor concentrations of PM_{2.5} based on case studies in nine cities in different regions representing a range of environmental conditions including mountainous dusty and coastal The report finds that the satellite derived estimates of PM_{2.5} in LMICs are associated with very large uncertainty ranging from 21 percent to 85 percent depending on the model used for translating satellite measurements of aerosol optical depth the parameter measured by satellites to surface level outdoor PM_{2.5} concentrations This report shows that satellites are unreliable for estimating ambient concentrations of PM_{2.5} in LMICs Furthermore satellite derived measurements cannot replace properly operated and maintained ground level monitoring networks for measuring the concentrations of PM_{2.5} that human beings are typically

exposed to daily Thus it is important that LMICs strengthen support for the establishment of ground level monitoring networks to measure air pollutants notably PM_{2.5} that cause mortality in Sub Saharan Africa and other regions with LMICs

Diseases ,2017-07 **Do beliefs about agricultural inputs counterfeiting correspond with actual rates of counterfeiting?** Ashour, Maha, Billings, Lucy,Gilligan, Daniel,Hoel, Jessica B.,Karachiwalla, Naureen,2016-08-26 Adoption of productivity and income enhancing agricultural technologies is conspicuously low in Africa south of the Sahara Farmers beliefs regarding the authenticity of agricultural inputs are important for explaining technology adoption if farmers do not believe that inputs are genuine they are unlikely to invest in them The degree of alignment between beliefs about and actual counterfeiting can help explain both the social costs of the lemons problem and low rates of adoption This is the first paper to explore whether farmer beliefs regarding counterfeiting align with actual rates of counterfeiting and we do so across a very large geographic area serving tens of thousands of farmers in Uganda using a more precise measure of counterfeiting than many previous studies We examine the relationship between beliefs and counterfeiting using quantitative measures of farmer beliefs regarding the authenticity of herbicide in their local market as well as a large random sample of laboratory tested herbicide samples to measure counterfeiting rates in local markets We report evidence of considerable counterfeiting of herbicides in local markets with nearly one in three bottles containing less than 75 percent of the labeled concentration of active ingredient We find evidence that farmers beliefs regarding the extent of counterfeiting of herbicide are significantly associated with measures of the actual prevalence of counterfeiting in local markets These results indicate that farmers are at least partly informed about the market for lemons problem in local input markets However the results also suggest that although better informed farmers imply a lower social cost of counterfeiting the high rate of counterfeiting and the relative accuracy of farmer information contributes to low adoption of agricultural inputs in Africa Fundamentals of HIV Medicine 2023 ,2023 Featuring overlapping recommendations for HIV and COVID 19 Fundamentals of HIV Medicine 2023 is the AAHIVM s end to end clinical resource for the treatment of individuals with HIV AIDS now updated to include injectable antiretroviral treatment and long term viral remission Political Handbook of the World 2018-2019 Tom Lansford,2019-03-19 The Political Handbook of the World provides timely thorough and accurate political information with more in depth coverage of current political controversies than any other reference guide The updated 2018 2019 edition will continue to be the most authoritative source for finding complete facts and analysis on each country s governmental and political makeup Compiling in one place more than 200 entries on countries and territories throughout the world this volume is renowned for its extensive coverage of all major and minor political parties and groups in each political system It also provides names of key ambassadors and international memberships of each country plus detailed profiles of more than 30

intergovernmental organizations and UN agencies This comprehensive update will include coverage of current events issues crises and controversies from the course of the last two years including Elections across Europe Referendum in Ireland Rohingya genocide in Myanmar The Venezuelan dictatorship The renaming of Swaziland to eSwatini Qatar diplomacy changes Historic meeting between the United States and North Korea Establishment of a new governing coalition in Liberia
