For more than three hundred years, the world wrestled with conflicts that arose between nation states. Nation states wielded military force, financial pressure, and diplomatic persuasion to create world order. That year, the US government revealed its involvement in Operation Olympic Games, a mission aimed at disrupting the Iranian nuclear program through cyberattacks. Russia and China conducted massive cyber espionage operations, and the world split over the governance of the Internet. Cyberspace became a battlefield. Cyber conflict is hard to track, often delivered by proxies, and has outcomes that are hard to gauge.
