By

QAISAR ABBAS*

Abstract:

This paper seeks to understand and critically examine various aspects of law relating to termination of pregnancies in certain circumstances, in Pakistan. Although the law on the subject was modified in 1997 following the judgment of the Supreme Court yet there are certain lacunas and inconsistencies in the existing law and it does not address the ever cropping exigencies of the contemporary society. After having a brief survey of the law on the subject in various other Muslim countries, it has been humbly suggested that the present law should be modified in certain ways to avoid such eventualities that impede the road to justice. In doing so, the basic principles of Muslim Jurisprudence have been adhered to, because any law in Pakistan can not survive if it is found/declared repugnant to the injunctions of Islam by the courts of competent jurisdiction.

Bruce Bawer, 2023-03-14 Gender ideology The anti racism craze The MeToo movement Sanctuary cities These are among the building blocks of our new woke world which during the last few years seemed to explode out of nowhere But it didn't emerge from nowhere It originated on the campuses of some of our most respected colleges and universities Over the past several decades more and more faculty members at those institutions have exchanged humanism for radicalism Rejecting the search for truth they've become purveyors of ideology They're no longer teachers but propagandists once devoted to the spread of knowledge they now focus on power dynamics seeing oppression everywhere and viewing everyone around them through the lens of group identity Among the most egregious consequences of this intellectual transformation has been the increasing prominence and power of disciplines called identity studies among them Women's Studies Black Studies Queer Studies and even more recently Fat Studies and Whiteness Studies In *The Victims Revolution* Bruce Bawer gives us the first true history of this phenomenon He takes us on a tour of the campuses classrooms and conferences where we see and hear professors proudly pushing these new orthodoxies On every page we can observe the origins of the virus that in the past decade has escaped from the ivory tower and infected the whole Western world *We Gather Together* Neil J.

Young, 2015-10-01 Tracing the interactions among evangelicals Catholics and Mormons from the 1950s to the present day *We Gather Together* recasts the story of the emergence of the Religious Right showing that it was not a brilliant political strategy of compromise and coalition building hatched on the eve of a history altering election Rather it was the latest iteration of a much longer religious debate that had been going on for decades Evangelicals Catholics and Mormons found common cause and pursued similar ends in debates about abortion school prayer the Equal Rights Amendment and tax exemptions for religious schools but they were far from a unified bloc cracks in the alliance shaped the movement from the very beginning This provocative book will reshape our understanding of the most important religious and political movement of the last 30 years

Fatal Misconception Matthew James Connelly, 2008 Listen to a short interview with Matthew Connelly Host Chris Gondek Producer Heron Crane *Fatal Misconception* is the disturbing story of our quest to remake humanity by policing national borders and breeding better people As the population of the world doubled once and then again well meaning people concluded that only population control could preserve the quality of life This movement eventually spanned the globe and carried out a series of astonishing experiments from banning Asian immigration to paying poor people to be sterilized Supported by affluent countries foundations and non governmental organizations the population control movement experimented with ways to limit population growth But it had to contend with the Catholic Church's ban on contraception

and nationalist leaders who warned of race suicide The ensuing struggle caused untold suffering for those caught in the middle particularly women and children It culminated in the horrors of sterilization camps in India and the one child policy in China Matthew Connelly offers the first global history of a movement that changed how people regard their children and ultimately the face of humankind It was the most ambitious social engineering project of the twentieth century one that continues to alarm the global community Though promoted as a way to lift people out of poverty perhaps even to save the earth family planning became a means to plan other people s families With its transnational scope and exhaustive research into such archives as Planned Parenthood and the newly opened Vatican Secret Archives Connelly s withering critique uncovers the cost inflicted by a humanitarian movement gone terribly awry and urges renewed commitment to the reproductive rights of all people
