

- D. Which of those behaviors match the definition of addictive behavior?
- E. Who sees this as a problem?
- F. Transition to Solution #1

III. State Government Controls

- A. Creating state laws that prohibit the use of cell phones by children aged 1-24 months
 - 1. Who agrees with this?
 - 2. What actions by the state have been proposed?
 - 3. Does this mean that police are involved in the process of enforcing these laws?
- B. What would be the benefits of this solution?
- C. What would be the problems of enforcing this solution?
- D. What do professionals say would be the effect on toddlers aged 1-24 months

IV. Parent Accountability

- A. Creating child protective services that shield Texas toddlers aged 1-24 months from access to what I have proved is an addictive device. Just as babies are protected from live electrical sockets and sharp objects, so would they be protected from cell phones.
- B. What would be the benefits of this solution?
- C. What would be the problems of enforcing this solution?
- D. What do professionals say would be the effect on Texas toddlers aged 1-24 months?

Problem And Solution Papers

Ponte,1992-08-11 A strong and fluent competency in mathematics is a necessary condition for scientific technological and economic progress However it is widely recognized that problem solving reasoning and thinking processes are critical areas in which students performance lags far behind what should be expected and desired Mathematics is indeed an important

subject but is also important to be able to use it in extra mathematical contexts Thinking strictly in terms of mathematics or thinking in terms of its relations with the real world involve quite different processes and issues This book includes the revised papers presented at the NATO ARW Information Technology and Mathematical Problem Solving Research held in April 1991 in Viana do Castelo Portugal which focused on the implications of computerized learning environments and cognitive psychology research for these mathematical activities In recent years several committees professional associations and distinguished individuals throughout the world have put forward proposals to renew mathematics curricula all emphasizing the importance of problem solving In order to be successful these reforming intentions require a theory driven research base But mathematics problem solving may be considered a chaotic field in which progress has been quite slow
