Problemes De Linguistique Generale 1:

Comparative Essays in Early Greek and Chinese Rational Thinking Jean-Paul Reding, 2017-03-02 This collection of essays by Reding in the emergent field of Sino Hellenic studies explores the neglected inchoative strains of rational thought in ancient China and compares them to similar themes in ancient Greek thought right at the beginnings of philosophy in both cultures Reding develops and defends the bold hypothesis that Greek and Chinese rational thinking are one and the same phenomenon Rather than stressing the extreme differences between these two cultures as most other writings on these subjects Reding looks for the parameters that have to be restored to see the similarities Reding maintains that philosophy is like an unknown continent discovered simultaneously in both China and Greece but from different starting points The book comprises seven essays moving thematically from conceptual analysis logic and categories to epistemology and ontology with an incursion in the field of comparative metaphorology One of the book's main concerns is a systematic examination of the problem of linguistic relativism through many detailed examples **Advances in Brand Semiotics & Discourse Analysis**

George Rossolatos, 2023-03-07 This volume addresses some of the most important conceptual methodological and empirical challenges and opportunities with which the sister disciplines of semiotics and discourse analysis are mutually confronted in the context of considering new avenues of cross disciplinary application to distinctive branding research streams In continuation of the collective volume Handbook of Brand Semiotics Kassel University Press 2015 which sought to consolidate relevant scholarship and to identify the main territories that have been established at the cross roads between branding and semiotic research the current Advances in Brand Semiotics Discourse Analysis aims at accomplishing further strides in critical areas such as the exigency for reconsidering the aptness of existing semiotic theories in the face of the radically shifting co creative landscape of digital branding the benefits of systematically micro analyzing brand communities discourses by drawing on CAQDAS programs the combination of big data analytics with discourse theory in corpus analysis and the epistemological issues that emerge while combining discourse analysis with time hallowed marketing qualitative and quantitative research methods At the same time the volume hosts a resourceful blend of empirical studies and novel conceptual frameworks in burgeoning streams such as place heritage culinary personal and political branding **Manual of Deixis in Romance Languages** Konstanze Jungbluth, Federica Da Milano, 2015-10-16 Deixis as a field of research has generated increased interest in recent years It is crucial for a number of different subdisciplines pragmatics semantics cognitive and contrastive linguistics to name just a few The subject is of particular interest to experts and students philosophers teachers philologists and psychologists interested in the study of their language or in comparing linguistic structures The different deictic structures not only the items themselves but also the oppositions between them reflect the fact that neither the notions of space time person nor our use of them are identical cross culturally This diversity is not restricted to the difference between languages but also appears among related dialects and language varieties This volume

will provide an overview of the field focusing on Romance languages but also reaching beyond this perspective Chapters on diachronic developments language change comparisons with other non European languages and on interfaces with neighboring fields of interest are also included The editors and authors hope that readers regardless of their familiarity with Romance languages will gain new insights into deixis in general and into the similarities and differences among deictic structures used in the languages of the world

The Fictions of Language and the Languages of Fiction Monika Fludernik, 2003-12-16 Monika Fludernik presents a detailed analysis of free indirect discourse as it relates to narrative theory and the crucial problematic of how speech and thought are represented in fiction Building on the insights of Ann Banfield's *Unspeakable Sentences* Fludernik radically extends Banfield's model to accommodate evidence from conversational narrative non fictional prose and literary works from Chaucer to the present Fludernik's model subsumes earlier insights into the forms and functions of quotation and aligns them with discourse strategies observable in the oral language Drawing on a vast range of literature she provides an invaluable resource for researchers in the field and introduces English readers to extensive work on the subject in German as well as comparing the free indirect discourse features of German French and English This study effectively repositions the whole area between literature and linguistics opening up a new set of questions in narrative theory

Language Contact in Europe Bridget Drinka, 2017-02-16 This book traces the spread of the perfect tense across Europe demonstrating the crucial role of language contact

Semantic Theories in Europe, 1830-1930 Brigitte Nerlich, 1992 It is widely believed by historians of linguistics that the 19th century was largely devoted to historical and comparative studies with the main emphasis on the discovery of soundlaws Syntax is typically portrayed as a mere sideline of these studies while semantics is seldom even mentioned If it comes into view at all it is usually assumed to have been confined to diachronic lexical semantics and the construction of some mostly ill conceived typologies of semantic change This book aims to destroy some of these prejudices and to show that in Europe semantics was an important although controversial area at that time Synchronic mechanisms of semantic change were discovered and increasing attention was paid to the context of the sentence to the speech situation and the users of the language From being a semantics of transformations a child of the biological geological paradigm of historical linguistics with its close links to etymology and lexicography the field matured into a semantics of comprehension and communication set within a general linguistics and closely related to the emerging fields of psychology and sociology

Reduced Parenthetical Clauses as Mitigators Stefan Schneider, 2007-02-01 While parentheticals attract constant attention they very rarely constitute the main subject of monographs This book provides a comprehensive account of reduced parenthetical clauses RPCs in three Romance languages Typical French RPCs are *je crois* *disons* *je dirais* *je pense* *je sais pas* and *je trouve* The research draws on 22 corpora of spoken French Italian and Spanish comprising a total amount of 3 975 500 words Its results consist in a typology of the relevant expressions in the three languages in the understanding of their pragmatic function and of the factors influencing their use and in the

description of their syntactic and prosodic properties Other findings are that RPCs are not restricted to statements but also occur in questions and that belief verbs are not as frequent as commonly assumed Although the book is about Romance parentheticals its conclusions are relevant for other languages *Semitic Languages* Gideon Goldenberg, 2013-01-10 This book offers a thorough authoritative account of the branches of Semitic among them Akkadian Aramaic Hebrew Arabic and Ethiopic It describes their history from ancient times to the present geographical distribution writing systems classification linguistic features distinctive characteristics and typological significance **Stéphane Mosès ›Displacements‹** Ashraf Noor, 2024-05-06 Stéphane Mosès explores in *Displacements* the poetry of Paul Celan and the work of major German Jewish thinkers in the context of his distinction between normative and critical modernity The first part contains a translation of his book *Approches de Paul Celan* the third part a translation of his lecture series *Figures philosophiques de la modernité juive* and the central section contains alongside a text on Freud essays on Goethe and Benjamin that extend his analysis beyond the Jewish sphere while engaging with the questions of tradition and its fragmentation that he raises there Edited translated and with an Introduction by Ashraf Noor **Henri Meschonnic Reader** Meschonnic Henri Meschonnic, 2019-09-27 Henri Meschonnic was a linguist poet translator of the Bible and one of the most original French thinkers of his generation He strove throughout his career to reform the understanding of language and all that depends on it His work has had a shaping influence on a generation of scholars and here for the first time a selection of these are made available in English for a new generation of linguists and philosophers of language This Reader featuring fourteen texts covering the core concepts and topics of Meschonnic's theory will enrich enhance and challenge your understanding of language It explores his key ideas on poetics the poem rhythm discourse and his critique of the sign Meschonnic's vast oeuvre was continuously preoccupied with the question of a poetics of society he constantly connected the theory of language to its practice in various fields and interrogated what that means for society In exploring this fundamental question this book is central to the study and philosophy of language with rich repercussions in fields such as translation studies poetics and literary studies and in redefining notions such as rhythm modernity the poem and the subject **200 Years of Syntax** Giorgio Graffi, 2001 This book argues convincingly against the widespread opinion that very few syntactic studies were carried out before the 1950s Relying on the detailed analysis of a large amount of original sources it shows that syntactic matters were in fact carefully investigated throughout both the 19th century and during the first half of the 20th century Moreover it illustrates how the enormous development of syntactic research in the last fifty years has already condemned even several recent ideas and analyses to oblivion and deeply influenced current research programs The wealth of research undertaken over the last two centuries is presented here in a systematic way taking as its starting point the relationship of syntax with psychology throughout this period The critical ideas expressed in the text are based on a detailed illustration of the different syntactic models and analyses rather than on the polemics between the different schools **Strategies of Difference in Modern**

Poetry Pierre Lagayette, 1998 This volume consists of a collection of essays mostly by European scholars on the ways modern poets have dealt with the crucial concept of difference in their practice of poetic composition What is examined here through the works of Stevens Roethke Yeats Pound Ammons Graham Laviera Reznikoff and Kinsella is the range of strategies used in poetry to convey a sense of disruption estrangement disturbance indeterminacy The aim is to track down the many kinds of difference that these poets works illustrate and the challenges they pose to the critic Theatre Semiotics Fernando de Toro, Mario Vald's, 1995-01-01 Theatre Semiotics provides a thorough argument for the place and the necessity of semiotics within the interpretive process of theatre The Foundations of Phenomenological Psychotherapy Giampiero Arciero, Guido Bondolfi, Viridiana Mazzola, 2018-05-30 This book addresses selected central questions in phenomenological psychology a discipline that investigates the experience of self that emerges over the course of an individual s life while also outlining a new method the formal indication as a means of accessing personal experience while remaining faithful to its uniqueness In phenomenological psychology the psyche no longer refers to an isolated self that remains unchanged by life s changing situations but is rather a phenomenon ipseity which manifests itself and constantly takes form over the course of a person s unique existence Thus the formal indication allows us to study the way in which ipseity relates to the world in different situations in a way that holds different meanings for different people Based on this new approach phenomenological psychotherapy marks a transition from a mode of grasping the truth about oneself through reflection to a mode of accessing the disclosure of self through a work of self transformation the care of self that requires the person to actually change her position on herself By putting forward this method the authors shed new light on the dynamic interplay between a person s historicity and uniqueness on the one hand and the related physiopathological mechanisms on the other providing evidence from the fields of genetics cardiology the neurosciences and psychiatry The book will appeal to a broad readership from psychiatrists psychologist and psychotherapists to researchers in these fields **Advances in Natural Language Processing** Aarne Ranta, Bengt Nordström, 2008-08-28 This book constitutes the refereed proceedings of the 6th International Conference on Natural Language Processing GoTAL 2008 Gothenburg Sweden August 2008 The 44 revised full papers presented together with 3 invited talks were carefully reviewed and selected from 107 submissions The papers address all current issues in computational linguistics and monolingual and multilingual intelligent language processing theory methods and applications The Expression of Tense, Aspect, Modality and Evidentiality in Albert Camus's L'Étranger and Its Translations / L'Étranger de Camus et ses traductions : questions de temps, d'aspect, de modalité et d'évidentialité (TAME) Eric Corre, Danh Thành Do-Hurinville, Huy Linh Dao, 2020-08-11 This book deals with the linguistic treatment of tense aspect modal evidential TAME expressions in translations of the French novel L tranger by Albert Camus into sixteen languages It is strongly empirical in spirit and uses the method of contrastive linguistics and multilingual comparison through the use of parallel corpora It has five main parts the first two offer insights into perfect and imperfect

tenses in Indo European languages the third part shifts the focus on non Indo European languages the fourth part deals with modality and the last part is more translation oriented These contents make this book a valuable contribution in semantic micro typology In terms of readership both linguists and specialists in translation as well as literature scholars can benefit from the contributions presented in this book It also relates to other usage based corpus driven studies of TAME phenomena and to monographs that take as their object of study the use of corpus linguistics in translation studies **The Social**

Semiotics of Populism Sebastián Moreno Barreneche, 2023-01-26 The concept of populism is currently used by scholars the media and political actors to refer to multiple and disparate manifestations and phenomena from across both the left and the right ends of the political spectrum As a result it defies neat definition as scholarship on the topic has shown over the last 50 years In this book Sebastián Moreno Barreneche approaches populism from a semiotic perspective and argues that it constitutes a specific social discourse grounded on a distinctive narrative structure that is brought to life by political actors that are labelled populist Conceiving of populism as a mode of semiotic production that is based on a conception of the social space as divided into two groups the People and the Other this book uses semiotic theory to make sense of this political phenomenon Exploring how the categories of the People and the Other are discursively constructed by populist political actors through the use of semiotic resources the ways in which meaning emerges through the oppositions between imagined collective actors is explained Drawing on examples from Europe North America and South America *The Social Semiotics of Populism* presents a systematic semiotic approach to this multifaceted political concept and bridges semiotic theory and populism studies in an original manner **Contemporary Encounters with Ancient Practice** Abraham Jacob

Greenstone, Ryan J. Johnson, 2024-12-31 This volume collects written and visual works that engage with opportunities of ancient practice from within the continental tradition More than surveying ancient ethical or political ideas the chapters develop divergent yet resonant approaches to concrete ways of living acting reflecting and being with others found in antiquity and its reception The practices involve the habits exercises activities philosophies and lives of today's readers and so most chapters encourage the reader to do something to put the ideas into practice Withstanding a temptation to simply theorize practice it insists on the embodied and shared materiality of living in singular times and places The practical encounters between this book and its readers range across antiquity and the contemporary world from political theatre casuistry and slavery to book production friendship and our own mortality Through thinker practitioner collaborations occasional pieces exhortations to readers and recipes for action this work strives to articulate and cultivate old and new practices for our lives **Translating Rumi into the West** Amir Sedaghat, 2023-02-28

Focusing on Rumi the best selling Persian mystical poet of the 13th century this book investigates the reception of his work and thought in North America and Europe and the phenomenon of Rumimania to elucidate the complexities of intercultural communication between the West and the Iranian and Islamic worlds Presenting tens of examples from the original and translated texts the book is a critical

analysis of various dimensions of this reception outlining the difficulties of translating the text but also exploring how translators of various times and languages have performed and explaining why the quality of reception varies Topics analysed include the linguistic and pragmatic issues of translation comparative stylistics and poetics and non textual factors like the translator s beliefs and the political and ideological aspects of translation Using a broad theoretical framework the author highlights the difficulties of intercultural communication from linguistic semiotic stylistic poetic ethical and sociocultural perspectives Ultimately the author shares his reflections on the semiotic specificities of Rumi s mystical discourse and the ethics of translation generally The book will be valuable to scholars and students of Islamic philosophy Iranian studies and translation studies but will appeal to anyone interested in the cultural dichotomies of the West and Islam
