Halvadakis, 2006-02-01 Olive Processing Waste Management contains a comprehensive review of literature and patent survey concerning olive processing waste Over 1 000 citations are presented Wastes considered include olive cultivation solid waste wastes arising from classical three and two phase olive mills and wastes generated during table olive processing In addition information is

presented concerning the management of spent olive oil e.g. from cooking. The book is divided into five parts. Part I presents background information concerning the characterization of olive processing wastes, their environmental impacts if disposed untreated, and the effect of utilized olive mill technology on the quantity and quality of generated wastes. Part II presents physical, thermal, physico-chemical, biological, and combined or miscellaneous processes for treating olive mill wastes. Part III concerns information on utilization of such wastes with or without prior treatment. Part IV concentrates on table olive processing waste and presents information regarding its characterization, treatment, and uses. Part V presents an economical and legislative overview regarding olive mill waste. The book contains a bibliography, glossary of terms used in the text, subject, patent, and author indices, as well as pertinent internet sites and authorities. Complete coverage of all available literature and patents concerning olive processing waste, including economic and legislative issues. Critical review of up to date utilized processes concerning treatment and uses of such waste. Determination of research needs for further utilization of such wastes.

*Domain-Specific Conceptual Modeling* Dimitris Karagiannis, Moonkun Lee, Knut Hinkelmann, Wilfrid Utz, 2022-03-10. This book demonstrates the significance of domain specific conceptual modeling through new research and development approaches that are manifested in each of the chapters. They include novel modelling methods and tools that emphasize the recent results accomplished and their adequacy to assess specific aspects of a domain. Each chapter offers detailed instructions on how to build models in a particular domain such as product service engineering, enterprise engineering, digital business ecosystems, and enterprise modelling and capability management. All chapters are enriched with case studies, related information, and tool implementations. The tools are based on the ADOxx metamodeling platform and are provided free of charge via OMiLAB. Furthermore, the book emphasizes possible future developments and potential research directions. The collection of works presented here will benefit experts and practitioners from academia and industry alike, including members of the conceptual modeling community as well as lecturers and students.

**Projects as Arenas for Renewal and Learning Processes** Rolf A. Lundin, Christophe Midler, 2012-12-06. There is a growing tendency to organize various aspects of business life by projects and to set up temporary organizations in a competition where speed and adaptability becomes a major necessity. Organizing by projects is perceived as a good way to ensure action and to stress the importance of getting work done. However, there is a need to balance the stress on action so that learning capabilities are not only retained but augmented. *Projects as Arenas for Renewal and Learning Processes* provides examples of how different types of projects function from a learning or renewal perspective, taken from a wide variety of real life environments in industrial and public organizations. This book illustrates the mistaken habit of assuming too much in the project area. For example, project notions are in fact culture dependent. Classical market oriented contracting business relations do not fit with the learning dimension of projects, and long term learning on core competencies and product development projects need to be connected. The book is also intended to represent many of the research frontiers in the project field. Enhancing learning

capabilities is or should be of a mutual concern to researchers and managers alike
