The total of 119 papers selected for the proceedings were carefully reviewed and selected from 297 submissions. **HWM**, 2008-11 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews. *The New Community Rules* Tamar Weinberg, 2009-07-08 This book offers crucial advice and strategies for marketing products and services on today's social web with case studies on what really works and what doesn't. **Innovative Applications of Ambient Intelligence: Advances in Smart Systems** Curran, Kevin, 2012-01-31 This book provides perspectives on the convergence of ubiquitous computing, intelligent systems, research and context awareness with the aim of encouraging the further development of ambient intelligence frameworks and research. **HWM**, 2008-08 Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in depth reviews. **Mobile Telecommunications in a High-Speed World** Peter Curwen, Jason Whalley, 2016-07-22 *Mobile Telecommunications in a High Speed World* tells the story of 3G and

higher speed mobile communication technologies Over ten years have passed since the first third generation 3G licences were awarded following debates about the merits of auctions versus beauty contests then nothing much happened More licences were issued a few roll outs commenced and everyone began to think it had all been a horribly expensive mistake That may still turn out to be the case but in the meantime there have been massive developments in terms of the number of licences and launches worldwide in the range of services that can be accessed in the range of devices that can be used to access them in operator strategies etc Even the technology has improved considerably with 4G now under discussion Much of this story has been chronicled largely on the Internet but the information is in tens of thousands of bits and pieces and a large part of it is either misleading or just plain wrong Here Peter Curwen and Jason Whalley introduce the outcomes of research that has involved the compilation of a unique database which details every licence and launch worldwide involving 3G The authors discuss the structure of the industry and the strategic behaviour of operators as well as the social consequences of the spread of 3G They examine the role of new entry upon competition and present analysis of the main operators involved the development of handsets and especially smartphones A number of country case studies are included This comprehensive and up to date volume includes a number of country studies and is written by two of the world's foremost researchers on this industry Mobile Telecommunications in a High Speed World will serve the needs of students academics and those involved or contemplating involvement with the telecoms industry Why pay thousands of dollars to consultancies to separate the wheat from the chaff with respect to 3G when you can read this book *Programming the Mobile Web* Maximiliano Firtman, 2010-07-23 Today's market for mobile apps goes beyond the iPhone to include BlackBerry Nokia Windows Phone and smartphones powered by Android webOS and other platforms If you're an experienced web developer this book shows you how to build a standard app core that you can extend to work with specific devices You'll learn the particulars and pitfalls of building mobile apps with HTML CSS and other standard web tools You'll also explore platform variations finicky mobile browsers Ajax design patterns for mobile and much more Before you know it you'll be able to create mashups using Web 2.0 APIs in apps for the App Store App World OVI Store Android Market and other online retailers Learn how to use your existing web skills to move into mobile development Discover key differences in mobile app design and navigation including touch devices Use HTML CSS JavaScript and Ajax to create effective user interfaces in the mobile environment Learn about technologies such as HTML5 XHTML MP and WebKit extensions Understand variations of platforms such as Symbian BlackBerry webOS Bada Android and iOS for iPhone and iPad Bypass the browser to create offline apps and widgets using web technologies **Dangerous Technologies** Brandaan Huigen, 2005-11-10 Dangerous Technologies focuses on the prevalent theft of consumer electronics in post Apartheid South Africa Through a material culture perspective it explores why these objects have commonly been targeted by bandits and subsequently circulated through the criminal underground The author traces ethnographically how devices travel between various social spheres

delving into the experiences of a range of individuals from diverse residents who fall victim to criminals to the bandits who steal electronics for money or drugs the African migrants who export consignments of stolen electronics to their home countries the envious residents who buy stolen electronics and finally the police attempting to grapple with the problem Dangerous Technologies suggests that electronics have widened digital divides between citizens resulting in underground circuits that seek to violently redistribute enviable electronics to low income residents who have not been able to formally participate in electronics consumption and use Due to porous borders the widespread theft and redistribution of electronics do not only stem from internal inequalities within South African society but also from broader disparities across the African continent The book furthers knowledge about how and why particularly modern electronics have precipitated violent property crime in democratic South Africa It is relevant to scholars of social and cultural anthropology particularly those with an interest in material culture digital anthropology and economic and political anthropology as well as criminologists
