Performance Funding for Higher Education Kevin J. Dougherty, Sosanya Jones, Hana Lahr, Rebecca S. Natow, Lara Pheatt, Vikash Reddy, 2016-10-04 A rigorous analysis of the impact and implications of performance funding for higher education Seeking greater accountability in higher education many states have adopted performance funding tying state financial support of colleges and universities directly to institutional performance based on specific outcomes such as student retention progression and graduation Now in place in over thirty states performance funding for higher education has been endorsed by the US Department of Education and major funders like the Gates and Lumina foundations Focusing on three states that are regarded as leaders in the movement Indiana Ohio and Tennessee Performance Funding for Higher Education presents the findings of a three year research study on its implementation and impacts Written by leading authorities and drawing on extensive interviews with government officials and college and university staff members this book describes the policy instruments states use to implement performance funding explores the organizational processes colleges rely on to determine how to respond to performance funding analyzes the influence of performance funding on institutional policies and programs reviews the impacts of performance funding on student outcomes examines the obstacles institutions encounter in responding to performance funding demands investigates the unintended impacts of performance funding The authors conclude that while performance funding clearly grabs the attention of colleges and leads them to change their policies and practices it also encounters major obstacles and has unintended impacts Colleges subject to performance funding are hindered in posting good results by inappropriate performance measures insufficient organizational infrastructure and the commitment to enroll many students who are poorly prepared or not interested in degrees These obstacles help explain why multivariate statistical studies have failed to date to find a significant impact of performance funding on student outcomes and why colleges are tempted to resort to weakening academic quality and restricting the admission of less prepared and less advantaged students in order to improve their apparent performance These findings have wide ranging implications for policy and research Ultimately the authors recommend that states create new ways of helping colleges with many at risk students define performance indicators and measures better tailored to institutional missions and improve the capacity of colleges to engage in organizational learning 108-1 Hearings: Departments of Labor, Health and Human Services, Education, and Related Agencies Appropriations for 2004, Part 7, May 6, 2003, *, 2003 **Symposium on "higher Education Policy"**, 1981 *Museums and Schools* Giuseppe "Pino" Monaco, Megan Wood, 2023-01-13 This is Volume 34 Number 1 of the Spring 2009 edition of the Journal of Museum Education with the topic of Museums and Schools It includes articles on provoking innovations developing a partnership between teachers and museum educators collaboration between science centre and the science industry online museums Ohio program National History Day Project and an appraisal of didactic material used by high school teachers **Appalachia**, 1972 *The National Science Foundation* United States.

Dickert-Conlin, Ross Rubenstein, 2007-06-21 The vast disparities in college attendance and graduation rates between students from different class backgrounds is a growing social concern Economic Inequality and Higher Education investigates the connection between income inequality and unequal access to higher education and proposes solutions that the state and federal governments and schools themselves can undertake to make college accessible to students from all backgrounds Economic Inequality and Higher Education convenes experts from the fields of education economics and public policy to assess the barriers that prevent low income students from completing college For many students from disadvantaged socioeconomic backgrounds the challenge isn't getting into college but getting out with a degree Helping this group will require improving the quality of education in the community colleges and lower tier public universities they are most likely to attend Documenting the extensive disjuncture between the content of state mandated high school testing and college placement exams Michael Kirst calls for greater alignment between K 12 and college education Amanda Pallais and Sarah Turner examine barriers to access at elite universities for low income students including tuition costs lack of information and poor high school records as well as recent initiatives to increase socioeconomic diversity at private and public universities Top private universities have increased the level and transparency of financial aid while elite public universities have focused on outreach mentoring and counseling and both sets of reforms show signs of success Ron Ehrenberg notes that financial aid policies in both public and private universities have recently shifted towards merit based aid away from the need based aid that is most helpful to low income students Ehrenberg calls on government policy makers to create incentives for colleges to increase their representation of low income students Higher education is often vaunted as the primary engine of upward mobility Instead as inequality in America rises colleges may be reproducing income disparities from one generation to the next Economic Inequality and Higher Education illuminates this worrisome trend and suggests reforms that educational

institutions and the government must implement to make the dream of a college degree a reality for all motivated students

web of political entities from community associations to mayors to lobbyists while ensuring that their institution's best interests are met. In an era of declining state appropriations, increasing economic instability, and surging enrollments, successful interaction with government representatives is crucial. Whether securing a million-dollar federal earmark or helping to support the local economy, the government relations officer's influence is essential both where it shows and behind the scenes. Drawing on more than thirty years of experience, William McMillen offers an insider's account of this major player in American higher education. Anecdotes and interviews with other government relations officers illustrate the challenges they face on and off campus.
