

Parametric Equations for Conic Sections

1

Circle: Parametric form:
 $x(t) = r\cos(t)$, $y(t) = r\sin(t)$, where
 r is the radius of the circle and t
is the parameter

2

Ellipse: Parametric form:
 $x(t) = a\cos(t)$, $y(t) = b\sin(t)$, a
and b are the lengths semi-
major and semi-minor axes

3

Parabola: Parametric form:
 $x(t) = t$, $y(t) = at^2 + bt + c$. Here,
the parameter t serves as the
 x -coordinate

4

Hyperbola: Parametric form:
 $x(t) = a\sec(t)$, $y(t) = b\tan(t)$,
where a and b are related to
the distances

Precalculus: A Functional Approach to Graphing and Problem Solving Karl Smith, 2013 Precalculus A Functional Approach to Graphing and Problem Solving prepares students for the concepts and applications they will encounter in future calculus courses In far too many texts process is stressed over insight and understanding and students move on to calculus ill equipped to think conceptually about its essential ideas This text provides sound development of the important mathematical underpinnings of calculus stimulating problems and exercises and a well developed engaging pedagogy Students will leave with a clear understanding of what lies ahead in their future calculus courses Instructors will find that Smith's straightforward student friendly presentation provides exactly what they have been looking for in a text

Precalculus Lawrence O. Cannon, Joseph Elich, 1996 **A Graphical Approach to Precalculus** E. John Hornsby, Margaret L. Lial, 1999 This book is the culmination of many years of teaching experience with the graphing calculator In it the authors treat the standard topics of precalculus solving analytically confirming graphically and motivating through applications Throughout the first five chapters the authors present the various classes of functions studied in a standard precalculus text Chapter One introduces functions and relations using the linear function as the basis for the presentation In this chapter the authors introduce the following approach which is used throughout the next four chapters after introducing a class of function the nature of its graph is examined then the analytic solution of equations based on that function is discussed Students are then shown how to provide graphical support for solutions using a graphing calculator Having established these two methods of solving equations the authors move on to the analytic methods of solving the associated inequalities Students then learn how the analytic solutions of these inequalities can also be supported graphically Finally once the student has a feel for the particular class of function under consideration the authors use analytic and graphical methods to solve interesting applications involving that function By consistently using this approach with all the different classes of functions students become aware that the authors are always following the same general procedure and just applying that procedure to a new kind of function Throughout the text the authors emphasize the power of technology but provide numerous warnings on its limitations the authors stress that it is only through understanding the mathematical concepts that students can fully appreciate the power of graphing calculators and use technology appropriately
