

solving as small a problem as finding my lost tie, and as big a problem as solving a dispute with my spouse.

Incremental Model

I have widely used this model whenever I faced conflicts with my co-employees. I applied this model's concept in making incremental improvements with my relations with employees with whom I had conflicts and disagreements. Conflicts are very normal to happen in a workplace but it is often very difficult to sit down with the parties involved and bring the situation to peace all at once. Thus, incremental technique has been very useful for me when I made efforts to transform the destructive situation to a constructive one either alone or in group, so that small benefits done to improve the conflict can help in improving the overall situation with the passage of time. The same concept helps in improving relationships other than work too.

Garbage Can Model

I had a hard time working with garbage can model as my organization had a very massive virtual garbage can through which I usually had to find solutions that could best answer my problems related to employee satisfaction, when both the solutions and the problems were not associated with each other at all (Cohen, March & Olsen, 1972, p.1). However, in my daily life, I have had a very good experience with this model as I find it very convenient to store a lot of possible solutions and problems in an imaginary garbage can and when an issue arises, I just go through the solutions and associate one with my problem.
