Perspectives On Argument 7th Edition:

Perspectives on Scientific Argumentation Myint Swe Khine, 2011-09-30 Argumentation arriving at conclusions on a topic through a process of logical reasoning that includes debate and persuasion has in recent years emerged as a central topic of discussion among science educators and researchers. There is now a firm and general belief that fostering argumentation in learning activities can develop students' critical thinking and reasoning skills and that dialogic and collaborative inquiries are key precursors to an engagement in scientific argumentation. It is also reckoned that argumentation helps students assimilate knowledge and generate complex meaning. The consensus among educators is that involving students in scientific argumentation must play a critical role in the education process itself. Recent analysis of research trends in science education indicates that argumentation is now the most prevalent research topic in the literature. This book attempts to consolidate contemporary thinking and research on the role of scientific argumentation in education. *Perspectives on Scientific Argumentation* brings together prominent scholars in the field to share the sum of their knowledge about the place of scientific argumentation in teaching and learning. Chapters explore scientific argumentation as a means of addressing and solving problems in conceptual change, reasoning, knowledge building, and the promotion of scientific literacy. Others interrogate topics such as the importance of language, discursive practice, social interactions, and culture in the classroom. The material in this book, which features intervention studies, discourse analyses, classroom-based experiments, anthropological observations, and design-based research, will inform theoretical frameworks and changing pedagogical practices as well as encourage new avenues of research.

Arguments and Arguing Thomas A. Hollihan, Kevin T. Baaske, 2015-11-17 The latest edition of *Arguments and Arguing* contains the same balance of theory and practice, breadth of coverage, current and relevant examples, and accessible writing style that made previous editions so popular in hundreds of classrooms. The authors draw from classic and recent argumentation theory and research, contextualized with well-chosen examples, to showcase a narrative style of argumentation and the values and attitudes of audiences. Readers learn how to employ both formal and informal argumentative strategies in an array of communication forums, from interpersonal interactions to academic debate to politics to business. A newly added chapter on visual argumentation and a striking color photo insert demonstrate the value and power of visual elements in the construction of arguments. The ability to argue is necessary if people are to solve problems, resolve conflicts, and evaluate alternative courses of action. While many are taught that arguing is counterproductive and arguments should be avoided, Hollihan and Baaske illustrate that arguing is an essential and fundamental human activity. Learning the art of effective argumentation entails a grasp of not only the strategies and principles of analysis and logical reasoning but also the importance of arguing in a positive and socially constructive fashion.

Passion in the Pulpit Jerry Vines, Adam B. Dooley, 2018-07-03 Biblical exegesis doesn't stop with the words alone. Faithful preachers exegete the emotion of the text as well. It's easy to let our own personalities dictate the emotional

dimension of our sermons but the best preachers mirror the Bible's emotive intent in their sermons In *Passion in the Pulpit* Jerry Vines and Adam Dooley will teach you how to exegete not just the verbal content of Scripture but its emotional appeal as well They show you the role the Bible's emotional intent should play in each stage of sermon prep and Offer exegetical steps to discern the biblical pathos Teach you how to avoid manipulation while making your sermons emotional Help you determine the appropriate limitations of emotional appeal Give you verbal vocal and visual techniques to help convey the biblical emotional intent in your sermons When we elevate the Bible's emotional intent above our own we preach truth rather than personality

Evaluating the Language of Argument Martin Hinton, 2020-11-30 This book is concerned with the evaluation of natural argumentative discourse and in particular with the language in which arguments are expressed It introduces a systematic procedure for the analysis and assessment of arguments which is designed to be a practical tool and may be considered a pseudo algorithm for argument evaluation The first half of the book lays the theoretical groundwork with a thorough examination of both the nature of language and the nature of argument This leads to a definition of argumentation as reasoning expressed within a procedure which itself yields the three frames of analysis used in the evaluation procedure Process Reasoning and Expression The second half begins with a detailed discussion of the concept of fallacy with particular attention on fallacies of language their origin and their effects A new way of looking at fallacies emerges from these chapters and it is that conception together with the understanding of the nature of argumentation described in earlier sections which ultimately provides the support for the Comprehensive Assessment Procedure for Natural Argumentation The first two levels of this innovative procedure are outlined while the third that dealing with language and involving the development of an Informal Argument Semantics is fully described The use of the system and its power of analysis are illustrated through the evaluation of a variety of examples of argumentative texts

Media Argumentation Douglas Walton, 2007-09-24 Media argumentation is a powerful force in our lives From political speeches to television commercials to war propaganda it can effectively mobilize political action influence the public and market products This book presents a new and systematic way of thinking about the influence of mass media in our lives showing the intersection of media sources with argumentation theory informal logic computational theory and theories of persuasion Using a variety of case studies that represent arguments that typically occur in the mass media Douglas Walton demonstrates how tools recently developed in argumentation theory can be usefully applied to the identification analysis and evaluation of media arguments He draws upon the most recent developments in artificial intelligence including dialogical theories of argument which he developed as well as speech act theory Each chapter presents solutions to problems central to understanding analyzing and criticizing media argumentation

On Reasoning and Argument David Hitchcock, 2017-04-06 This book brings together in one place David Hitchcock's most significant published articles on reasoning and argument In seven new chapters he updates his thinking in the light of subsequent scholarship Collectively the papers articulate a distinctive

position in the philosophy of argumentation Among other things the author develops an account of material consequence that permits evaluation of inferences without problematic postulation of unstated premises updates his recursive definition of argument that accommodates chaining and embedding of arguments and allows any type of illocutionary act to be a conclusion advances a general theory of relevance provides comprehensive frameworks for evaluating inferences in reasoning by analogy means end reasoning and appeals to considerations or criteria argues that none of the forms of arguing ad hominem is a fallacy describes proven methods of teaching critical thinking effectively

Argument Dialectics: The Place of Reasons in Logic Hubert Marraud, 2025-06-12 This book is a systematic exposition of Argument Dialectics AD Despite its name argument dialectics is a logical approach to argumentation theory AD stands out among theories of argument because of three unusual features it is reasons based holistic and particularistic This implies that AD conceives of logic as a theory of the dialectical construction of reasons not as a theory of inferences Consequently contrary to other logical approaches AD focuses on the study of inter argumentative relations especially those of opposition and weighing The book makes an extensive use of the theory of reasons a branch of metaethics that has been a very valuable quarry of intuitions and concepts for the elaboration of a reason based theory of argument The oppositions generalism particularism and atomism holism proposed by Jonathan Dancy which play a central role in the book and in the development of AD have been adapted from the theory of reasons and the same can be said of the distinction between different statuses of reasons that AD associates with different kinds of counterarguments Conceiving of the theory of argument in terms of reasons has the effect of situating the paradigm of argumentation in practical argumentation reasoning about what to do rather than in theoretical argumentation about what to believe as inference based theories do Hence this book is of interest to argumentation theorists communication theorists epistemologists linguists moral philosophers and philosophers of law
