## ABOUT YOUR PHONE

### Overview

Your Polycom SoundStation Duo conference phone is a dual-mode conference phone. This means it can operate in the following modes:

- **PSTN mode**—In this mode, the phone is connected to a standard (analog) phone jack so calls can be made using the Public Switched Telephone Network (PSTN).
- **SIP mode**—In this mode, the phone is connected to a Session Initiation Protocol (SIP) server so calls can be made over Internet Protocol (IP) networks. In SIP mode, phones can use advanced features such as messaging, forwarding, and transferring.

Your phone may be set up to operate in either mode. If your phone is connected to both an analog phone jack and the network, your phone may be able to switch between modes.

The mode your phone operates in determines which features are available on your phone.

#### Note:

Certain phone features are set up by your system administrator or determined by your phone environment. As a result, some features may not be available or may operate differently on your phone. Unless otherwise noted, this guide contains generic information for using your phone in either SIP or PSTN mode. For specific information on using your phone in each mode, see the User Guide.
