 this exam **Teaching As A Reflective Practice** Ian Westbury, Stefan Hopmann, Kurt Riquarts, 2012-08-06 This volume
 presents a mix of translations of classical and modern papers from the German Didaktik tradition newly prepared essays by
 German scholars and practitioners writing from within the tradition and interpretive essays by U S scholars It brings this
 tradition which virtually dominated German curricular thought and teacher education until the 1960s when American
 curriculum theory entered Germany and which is now experiencing a renaissance to the English speaking world where it has
 been essentially unknown The intent is to capture in one volume the core at least of the tradition of Didaktik and to
 communicate its potential relevance to English language curricularists and teacher educators It introduces a theoretical
 tradition which although very different in almost every respect from those we know offers a set of approaches that suggest
 ways of thinking about problems of reflection on curricular and teaching praxis the core focus of the tradition which the
 editors believe are accessible to North American readers with appropriate translation These ways of thinking and related
 praxis are very relevant to notions such as reflective teaching and the discourse on teachers as professionals By raising the
 possibility that the new tradition of Didaktik can be highly suggestive for thinking through issues related to a number of

central ideas within contemporary discourse and for exploring the implications of these ideas for both teacher education and for a curriculum theory appropriate to these new contexts for theorizing this book opens up a gold mine of theoretical and practical possibilities
