

The Next question is on prisms and you will be asked to calculate the refractive index of prism and the deviating power of a prism in prism dioptres.

A prism has the following parameters:

Apical angle = 5 degrees

Deviation of light beam = 4 degrees

#### Part a

Calculate the refractive index of the prism

Using  $d = (n-1)a$  we will re-arrange this formula to find n

now we can add the variables available to us

as the 5 is a multiplication we can take it across to the other side and it will become a division factor.

as the brackets have been taken away we can now take the minus 1 across to the other side and it will become plus 1

**= refractive index of the prism**

#### Part b

Find the deviating power in prism dioptres ( $\Delta$ ) of the above prism in **part a**
