 every aspect of contemporary American life Institutions repeated failures to disrupt systemic oppression in STEM has led to a  
 mostly white cisgender and male scientific workforce replete with implicit and or explicit biases Education holds one pathway  
 to disrupt systemic linkages of STEM oppression from society to the classroom Maintaining views on science as inherently  
 objective isolates it from the world in which it is performed STEM education must move beyond the transactional approaches  
 to transformative environments manifesting respect for students social and educational capital We must create a STEM  
 environment in which students with marginalized identities feel respected listened to and valued We must assist students in  
 understanding how their positionality privilege and power both historically and currently impacts their meaning making and  
 understanding of STEM      *The Athenaeum* , 1849
