## Objective

This program is designed to help you understand the complexities of pro rata debt share rules for business-related debts.

## Directions

After this program, you should be able to identify or describe the various factors that affect the distribution of pro rata debt.

## Pro Rata Debts

Debt and liabilities are normally distributed pro rata with their respective underlying assets. For example, if the underlying asset is real estate, there is a real estate mortgage payment, or if the asset is a business, there is a business loan, the debt is normally distributed pro rata with the underlying asset. However, there are some exceptions to this rule, and these are the exceptions that you will be studying in this program.

1. **Debt on a business loan** is normally distributed pro rata with the underlying asset. For example, if the underlying asset is a business, there is a business loan, the debt is normally distributed pro rata with the underlying asset.
