M. Dickson,Mary R. Hardy,Howard R. Waters,2009-09-24 How can actuaries best equip themselves for the products and risk structures of the future Using the powerful framework of multiple state models three leaders in actuarial science give a modern perspective on life contingencies and develop and demonstrate a theory that can be adapted to changing products and technologies The book begins traditionally covering actuarial models and theory and emphasizing practical applications using computational techniques The authors then develop a more contemporary outlook introducing multiple state models emerging cash flows and embedded options Using spreadsheet style software the book presents large scale realistic examples Over 150 exercises and solutions teach skills in simulation and projection through computational practice Balancing rigour with intuition and emphasising applications this text is ideal for university courses but also for individuals preparing for professional actuarial exams and qualified actuaries wishing to freshen up their skills *Applied Digital Signal Processing* Dimitris G. Manolakis,Vinay K. Ingle,2011-11-21 Master the basic concepts and methodologies of digital signal processing with this systematic introduction without the need for an extensive mathematical background The authors lead

the reader through the fundamental mathematical principles underlying the operation of key signal processing techniques providing simple arguments and cases rather than detailed general proofs Coverage of practical implementation discussion of the limitations of particular methods and plentiful MATLAB illustrations allow readers to better connect theory and practice A focus on algorithms that are of theoretical importance or useful in real world applications ensures that students cover material relevant to engineering practice and equips students and practitioners alike with the basic principles necessary to apply DSP techniques to a variety of applications Chapters include worked examples problems and computer experiments helping students to absorb the material they have just read Lecture slides for all figures and solutions to the numerous problems are available to instructors **Regression Analysis** Rudolf J.
