Bluetooth Headset Pairing Instructions

1. When you turn on your Samsung Bluetooth headset for the first time, it proceeds into pairing mode immediately.
2. If you have paired the headset with other Bluetooth devices, make sure that the headset is off. Press and hold the Multi-Function button until the blue indicator light stays solid blue after blinking.
3. Set your Bluetooth phone to discover the headset by following your phone's guide. Typically, the steps involve going to a "Setting", "Connection", or "Bluetooth" menu on your phone and then selecting the option to discover Bluetooth devices.
4. Your phone will find the Samsung headset and ask if you want to pair with it. Confirm this by pressing the Yes or OK key.
5. Enter a passkey or PIN, 0000 (4 zeros), then press the Yes or OK key.
6. If pairing was successful, the indicator light will flash in blue 10 times rapidly before going to flashing every 3 seconds. If unsuccessful, the light remains on, and you will need to re-attempt pairing.
7. When you turn on your headset after pairing with the phone, the headset is automatically connected to the phone.
8. When you turn on your phone after pairing with the headset, the phone is connected to the headset by pressing the Multi-Function button.

Communication is a radio frequency technology that allows objects such as mobile phones computers tags or posters to
exchange information wirelessly across a small distance This report on the progress of Near Field Communication reviews
the features and functionality of the technology and summarizes the broad spectrum of its current and anticipated
applications We explore the development of NFC technology in recent years introduce the major stakeholders in the NFC

ecosystem and project its movement toward mainstream adoption Several examples of early implementation of NFC in libraries are highlighted primarily involving the use of NFC to enhance discovery by linking books or other physical objects with digital information about library resources but also including applications of NFC to collection management and self checkout Future uses of NFC in libraries such as smart posters or other enhanced outreach are envisioned as well as the potential for the touch paradigm and Internet of things to transform the ways in which library users interact with the information environment Conscious of the privacy and security of our patrons we also address continuing concerns related to NFC technology and its expected applications recommending caution awareness and education as immediate next steps for librarians

Location Aware Apps for Tourism Cathal Greaney, 2012-09-19 This book demonstrates the usefulness of the modern smartphone for providing location aware applications to the tourist as an end user During the course of this book it has been demonstrated that the modern smartphone has the accuracy and responsiveness required to provide excellent location aware functionality to the tourist end user The GPS section outlines how a developer can leverage this functionality to make apps that use close quarter location positioning to help the average tourist in a host of different ways It has also been demonstrated that bluetooth and other technologies such as QR coding are effective at providing location aware functionality in situations where GNSS GPS is ineffective such as in indoor environments Lastly the book outlines how an engineer could provide augmented location services when GPS is not available by using the RSSI signal from Bluetooth devices
