The China-US Partnership to Prevent Spina Bifida Deborah Kowal, 2015-08-11 In 1983 two doctors one from each side of the world decided to form a partnership and so began a scientific adventure that would improve the odds that babies could be born healthy and whole Neural tube defects that severely disabled or killed babies were epidemic in China where the folk term was *guai tai* roughly monster baby for an infant whose embryonic neural tube doesn't completely close and whose head and neck may be misshapen or spine may protrude and a significant problem in the United States leading teams of researchers from the United States and China to combine forces to recruit more than 285 000 Chinese women and to follow nearly 250 000 pregnancies in an epidemiological study Sixteen thousand staff were involved in running the project which encountered massive bureaucratic obstacles as well as cultural differences politicking for study designs and funding the crisis of Tiananmen Square and testy debates over research ethics Nevertheless the researchers persevered in a collaboration that lasted more than three decades and led to landmark findings on the role of folic acid in preventing spina bifida Fortifying cereal grain products with folic acid became routine in the United States and a growing number of nations around the world that intervention was named one of the ten great public health achievements of the last decade

Partition and Peace in Civil Wars Carter R. Johnson, 2021-08-09 This book examines whether partition is an effective means to resolve ethnic and sectarian civil wars It argues that partition is unlikely to end ongoing ethnosectarian civil wars but it can increase the likelihood of preventing civil

war recurrence as long as the partition separates civilians and militaries The book presents in depth case studies of Georgia Abkhazia and Moldova Transnistria in addition to cross national comparisons of all ethnosectarian civil wars between 1945 and 2004 This analysis demonstrates when partitioning a country can help transform an identity based civil war into a lasting peace Highlighting practical and moral challenges of separating ethnosectarian groups the book contends that complete partitions cannot be easily implemented by the international community and this limits their applicability It also demonstrates that ethnosectarian civil wars are driven less by inter group antagonisms and more by state breakdown meaning displaced minorities can reintegrate peacefully after partition as long as a minimal level of state building has been completed The book ends by examining whether partition would be useful for five contemporary conflicts Iraq Ukraine Donbass Afghanistan Sudan South Sudan and Serbia Kosovo This book will be of much interest to students of civil wars ethnic conflict peace and conflict studies and international relations
