AIChE Equipment Testing Procedure - Trayed and Packed Columns American Institute of Chemical Engineers (AIChE),2014-02-03 AIChE manual updates and consolidates procedures for testing performance of distillation columns From classic distillation operations to air stripping to other separations processes selecting the correct column for appropriate efficient safe and environmentally sound operations can be an important step The newest updated volume in AIChE s long running Equipment Testing Procedures series Trayed and Packed Columns A Guide to Performance Evaluation Third Edition provides chemical engineers plant managers and other professionals with helpful advice to assess and measure performance of a variety of distillation columns including those that utilize bubble cap sieve valve trays or packing material The new book combines and updates into one user friendly volume the best available field knowledge from previous publications on both types of distillation columns Designed not as a single set of compulsory steps but as a compilation of techniques it will allow the user to select the procedure that best applies to its operating parameters The testing steps presented can be used to assess reliable performance data on mass transfer efficiency capacity energy consumption and pressure drop information essential to effective troubleshooting of performance problems identifying capacity bottlenecks determining operating ranges and a number of other routine maintenance and optimization processes Opening with an extensive definition section organized by topical area the book then goes on to address Selection of instrumentation and identification of elements to be measured Pre test planning procedures Strategies for data collection and evaluation including sampling procedures Pre test in test and post test considerations equipment safety process environmental Computation and interpretation of results including individual breakdowns for trayed and

packed columns in terms of hydraulic and efficiency performance Test troubleshooting analysis in twelve key areas The book concludes with appendices for relevant symbols and nomenclature plus sample calculations generated from performance tests With its engineer tested procedures and thorough explanations Trayed and Packed Columns A Guide to Performance Evaluation Third Edition is an essential text for anyone engaged in implementing new technology in equipment design identifying process problems and optimizing equipment performance

Chemical Process Equipment - Selection and Design (Revised 2nd Edition) James R. Couper, W Roy Penney, James R. Fair PhD, 2009-08-11 A facility is only as efficient and profitable as the equipment that is in it this highly influential book is a powerful resource for chemical process or plant engineers who need to select design or configure plant successfully and profitably It includes updated information on design methods for all standard equipment with an emphasis on real world process design and performance The comprehensive and influential guide to the selection and design of a wide range of chemical process equipment used by engineers globally Copious examples of successful applications with supporting schematics and data to illustrate the functioning and performance of equipment Revised edition new material includes updated equipment cost data liquid solid and solid systems and the latest information on membrane separation technology Provides equipment rating forms and manufacturers data worked examples valuable shortcut methods rules of thumb and equipment rating forms to demonstrate and support the design process Heavily illustrated with many line drawings and schematics to aid understanding graphs and tables to illustrate performance data

Collection Development Issues in the Online Environment Di Su, 2013-10-28 Expand your knowledge of problems and possibilities with e material acquisitions around the world to aid in making your own decisions The demand for electronic material in academic libraries is growing and shows no sign of abating Collection Development Issues in the Online Environment addresses key issues in electronic materials development and presents cutting edge practices from academic libraries around the world Leading authorities reveal insights on both common and special concerns that every library administrator can use in making decisions about their own collections The text also presents real life case studies illustrating approaches that can be modified for effective planning of your own library acquisitions The strategies are practical the information clear and helpful all of it contained in a single useful volume that every information science professional or academic can use Collection Development Issues in the Online Environment is separated into three sections The first section tackles issues common to most academic libraries such as electronic journal delivery and budgeting The second section addresses special library digital issues such as the preservation and dissemination of unique types of information such as annual reports The final section delves into the future of library electronic acquisitions and the coming challenges This text is carefully referenced and includes tables and figures to enhance understanding of the subjects Collection Development Issues in the Online Environment topics include virtual learning environments VLE problems of pricing and access with individually ordered or packaged electronic journals budgeting issues in electronic
