See What's New in the Second Edition: Chapter on living controlled radical polymerization using a unique problem solving approach; Chapter on polymer synthesis by click chemistry using a unique problem solving approach; Relevant and practical work out problems and case studies; Examples of novel methods of synthesis of complex polymer molecules by exciting new techniques; Figures and schematics of the novel synthetic pathways described in the new examples. Author Manas Chanda takes an innovative problem solving approach in which the text presents worked out problems or questions with answers at every step of the development of a new theory or concept, ensuring a better grasp of the subject and scope for self study. Containing 286 text embedded solved problems and 277 end of chapter home study problems fully answered separately in a Solutions Manual, the book provides a comprehensive understanding of the subject. These features and more set this book apart from other currently available polymer chemistry texts.
