

Population Distributions

How does population distribution affect the outcome?

Why?

Alaska encompasses 57 million acres of unoccupied forest land, it is the largest state in the United States, yet with a population of under 700,000 people votes that carry much weight in Senate, House, and Supreme Court elections relative to states with a population of nearly 7 million. How does the distribution of the 4,000,000 total land acres are represented in the election? What are the reasons for the high population density regions and low density areas? What effect does this representation have on the outcome?
