Smith, 2013-10-28 This three volume encyclopedia on the history of American food and beverages serves as an ideal companion resource for social studies and American history courses covering topics ranging from early American Indian foods to mandatory nutrition information at fast food restaurants The expression you are what you eat certainly applies to Americans not just in terms of our physical health but also in the myriad ways that our taste preferences eating habits and food culture are intrinsically tied to our society and history This standout reference work comprises two volumes containing

more than 600 alphabetically arranged historical entries on American foods and beverages as well as dozens of historical recipes for traditional American foods and a third volume of more than 120 primary source documents Never before has there been a reference work that coalesces this diverse range of information into a single set The entries in this set provide information that will transform any American history research project into an engaging learning experience Examples include explanations of how tuna fish became a staple food product for Americans how the canning industry emerged from the Civil War the difference between Americans and people of other countries in terms of what percentage of their income is spent on food and beverages and how taxation on beverages like tea rum and whisky set off important political rebellions in U S history Savoring Gotham Andrew F. Smith,2015 Savoring Gotham traces the rise of New York City s global culinary stardom in 570 accessible yet well researched A Z entries From the Native Americans who arrived in the area 5 000 years before New York was New York and who planted the maize squash and beans that European and other settlers to the New World embraced centuries later to Greek diners in the city that are arguably not diners at all this is the first A Z reference work to take a broad and historically informed approach to NYC food and drink **Activation Or Workfare?** Ivar Lødemel,Amilcar Moreira,2014 The last decade of the 20th century was marked by a shift in how welfare states deal with those at the bottom of the income ladder This shift involved the introduction strengthening of work obligations as a condition for receiving minimum income benefits which in some countries was complemented by efforts to help recipients return to the labour market namely through the investment in active labour market policies ALMP Based on case studies of developments in the US and eight European nations UK Norway Denmark Netherlands Germany France Portugal and the Czech Republic this book argues that this first set of reforms was followed by a second wave of reforms that whilst deepening the path towards the focus on work brings important innovations be it the tools used to help recipients back to the labour markets ex financial incentives and in how activation policies are delivered ex integration of benefit and employment services Looking at the array of developments introduced during this period we discern two key trends The first concerns the strengthening of the role of the market in the governance of activation which is visible in the strengthening of the focus on work or the marketisation of employment services The second concerns a move towards the individualisation of service delivery visible in the expansion of the use of personal action plans or in efforts to streamline service delivery Finally we show that the onset of the sovereign debt crisis in Europe has triggered a new wave of reforms Whilst tentative only our analysis points to a worrying trend of the curtailment or benefits Portugal and activation services Netherlands Czech Republic to minimum income recipients and in parallel a further deepening of the focus on work conditionality UK and Norway *COVID-19 in Brooklyn* Jerome Krase,Judith DeSena,2023-03-07 COVID 19 in Brooklyn Everyday Life During a Pandemic looks closely at the ways that the COVID 19 pandemic impacted the lives of ordinary people living in the super gentrified Brooklyn neighborhoods of Park Slope and Greenpoint Williamsburg where the authors hunkered down during the 2020 lockdown

Putting their private lives into broader scientific and public contexts Krase and DeSena discuss a wide range of research methods and theories as well as print and internet media sources about the pandemic With words and images the scholar activist authors place their own personal experiences and those of their family and neighbors inside the broader context of global and national medical emergencies as well as related economic social and political unrest such as widespread unemployment the Black Lives Matter Movement and the contentious 2020 presidential election Using a distributive social justice perspective and examining their own privileges they discover and discuss the racial and economic inequities that affected the lives of other Brooklynites These disparities included public health measures and lack of access to basic necessities of urban living The book also addresses the cultural and economic shifts that took place at the start of the pandemic and contemplate how those forces will impact on future urban life asking what the new normal of business entertainment education housing and work will look like locally and globally This richly illustrated book offers an invaluable local study of the impact of the pandemic on ordinary people in Brooklyn As such it will be of great interest to students and researchers in the humanities and social sciences

The Oxford Encyclopedia of Food and Drink in America Andrew Smith,2013-01-31 Home cooks and gourmets chefs and restaurateurs epicures and simple food lovers of all stripes will delight in this smorgasbord of the history and culture of food and drink Professor of Culinary History Andrew Smith and nearly 200 authors bring together in 770 entries the scholarship on wide ranging topics from airline and funeral food to fad diets and fast food drinks like lemonade Kool Aid and Tang foodstuffs like Jell O Twinkies and Spam and Dagwood hoagie and Sloppy Joe sandwiches

Community Development Approaches to Improving Public Health Robert Ogilvie,2013-09-13 As the rates of chronic diseases like diabetes asthma and obesity skyrocket research is showing that the built environment the way our cities and towns are developed contributes to the epidemic rates of these diseases It is unlikely that those who planned and developed these places envisioned these situations Public health community development planning and other fields influencing the built environment have operated in isolation for much of recent history with the result being places that public health advocates have labelled designed for disease The sad irony of this is that planning and public health arose together in response to the need to create health standards zoning and building codes to combat the infectious diseases that were prevalent in the industrializing cities of late nineteenth and early twentieth century America In recent years the dramatic rise in chronic disease rates in cities and towns has begun to bring public health and planning back together to promote development pattern and policies facilitating physical activity and neighbourly interactions as antidotes In this book a number of such community development efforts are highlighted bringing attention to the need to coordinate planning community development and health policy This book was originally published as a special issue of Community Development

Clearinghouse Review ,2012 Arab New York Emily Regan Wills,2019-02-26 From Bay Ridge to Astoria explore political action in Arab New York Arab Americans are a numerically small proportion of the US population yet have been the

target of a disproportionate amount of political scrutiny Most non Arab Americans know little about what life is actually like within Arab communities and in organizations run by and for the Arab community Big political questions are central to the Arab American experience how are politics integrated into Arab Americans everyday lives In Arab New York Emily Regan Wills looks outside the traditional ideas of political engagement to see the importance of politics in Arab American communities in New York Regan Wills focuses on the spaces of public and communal life in the five boroughs of New York which are home to the third largest concentration of people of Arab descent in the US Many different ethnic and religious groups form the overarching Arab American identity and their political engagement in the US is complex Regan Wills examines the way that daily practice and speech form the foundation of political action and meaning Drawing on interviews and participant observation with activist groups and community organizations Regan Wills explores topics such as Arab American identity for children relationships with Arab and non Arab Americans young women as leaders in the Muslim and Arab American community support and activism for Palestine and revolutionary change in Egypt and Yemen Ultimately she claims that in order to understand Arab American political engagement and see how political action develops in Arab American contexts one must understand Arab Americans in their own terms of political and public engagement They are Regan Wills argues profoundly engaged with everyday politics and political questions that don t match up to conventional politics Arab New York draws from rich ethnographic data and presents a narrative compelling picture of a community engaging with politics on its own terms Written to expand the existing literature on Arab Americans to include more direct engagement with politics and discourse Arab New York also serves as an appropriate introduction to Arab American communities ethnic dynamics in New York City and elsewhere in urban America and the concept of everyday politics

Socioeconomic Factors Associated with Hunger and Poverty in Urban America United States. Congress. House. Select Committee on Hunger,1986 **Getting the Runaround** John M. Halushka,2023-09-19 Getting the Runaround takes readers into the bureaucratic spaces of prisoner reentry examining how returning citizens navigate the institutional circuit of parole offices public assistance programs rehabilitation facilities shelters and family courts Drawing on three years of ethnographic fieldwork and forty five in depth interviews with formerly incarcerated men returning to New York City John M Halushka argues that the very institutions charged with facilitating the transition from incarceration to community life perversely undermine reintegration by imposing a litany of bureaucratic obstacles This runaround is not merely a series of inconveniences but rather an extension of state punishment that exacerbates material poverty and diminishes citizenship rights By telling the stories of men caught in vicious cycles of poverty bureaucratic processing and social control Halushka demonstrates the urgent need to shift reentry away from an austerity driven compliance based framework and toward a vision of social justice and inclusion *Review of the Financial Plan for the City of New York Fiscal Years 2001 Through 2004* New York (State). Solomon, 2014-09-04 Twenty first century US policymakers face a great challenge How can federal government help more people achieve the American dream Specifically how can we provide greater opportunities for less prosperous individuals enabling them to succeed through hard work on their merits and take increased responsibility for their lives Lewis D Solomon sees this as the challenge of our time He seeks to thread the fine public policy needle between social democratic efforts to perfect the world and those who negatively view public sector programs Based on the premise that capitalism is not inherently unjust and defective and American capitalism s structural features do not inexorably thwart opportunity Building an Opportunity Society offers the possibility of more limited carefully structured cost effective empirically verified federal policies and programs Solomon first provides the background and context of many existing domestic challenges and problems that the current and proposed federal policies and programs seek to address He then analyzes the federal safety net that keeps Americans from poverty and helps reduce income inequality Finally he presents a lifecycle analysis of current federal policies and programs preventive and remedial designed as part of the Entitlement State but if restructured could facilitate the building of an Opportunity Society Solomon challenges policymakers to take a fresh look at how best to achieve society s goals for all citizens *Growing Gardens, Building Power* Justin Sean Myers, 2022-10-14 Across the United States marginalized communities are organizing to address social economic and environmental inequities through building community food systems rooted in the principles of social justice But how exactly are communities doing this work why are residents tackling these issues through food what are their successes and what barriers are they encountering This book dives into the heart of the food justice movement through an exploration of East New York Farms ENYF one of the oldest food justice organizations in Brooklyn and one that emerged from a bottom up asset oriented development model It details the food inequities the community faces and what produced them how and why residents mobilized to turn vacant land into community gardens and the struggles the organization has encountered as they worked to feed residents through urban farms and farmers markets This book also discusses how through the politics of food justice ENYF has challenged the growth oriented development politics of City Hall opposed the neoliberalization of food politics navigated the funding constraints of philanthropy and the welfare state and opposed the entrance of a Walmart into their community Through telling this story Growing Gardens Building Power offers insights into
