The heart rates of 15 students were lower while the heart rate of 5 students were higher after lunch.

The best explanation for the observation that the heart rates of 5 students were higher after class is

- A student is opening and closing clothespins as part of a lab activity. The student begins to experience muscle fatigue, and the rate at which the student is opening and closing the clothespins slows. Which graph best represents the relationship between a time and number of clothespin squeezes?
