Digitizing Flat Media Joy M. Perrin,2015-12-16 Here is a concise guide to the nuts and bolts of converting flat media books papers maps posters slides micro formats etc into digital files It provides librarians and archivists with the practical knowledge to understand the process and decision making in the digitization of flat media Instead of having to learn by trial and error they will get a well rounded education of the practical aspects of digitization and have a better understanding of their options This is the stuff they don t teach you in school People can be lured into thinking that all it takes to digitize something is a scanner and some metadata This guide illustrates the practical aspects of digitization such as the physical challenges of scanning books without cutting the spine the differences between a scanner that uses a scanning head vs a scanner that uses a camera the different options for workflow for digitized items and the reasons for choosing one scanner over another for reasons other than price Digitizing Flat Media Principles and Practices is intended to give librarians and archivists the benefit a seasoned digitization professional guiding them and helping them figure out exactly what needs to be done when

Assessing English Language Learners: Bridges to Educational Equity Margo Gottlieb,2016-03-22 Build the bridges for English language

learners to reach success Ten years ago the first edition of Margo Gottlieb's *Assessing English Language Learners* changed the dialogue about how educators envision educational equity for students Since then the ELL and dual language student populations have grown exponentially and so has the need for forward thinking and effective approaches to facilitating students' academic language development alongside their content knowledge This thoroughly updated edition of Gottlieb's classic delivers a complete set of tools, techniques, and ideas for planning and implementing instructional assessment The book includes:

- A focus on academic language use in every discipline from mathematics to social studies within and across language domains
- Emphasis on linguistically and culturally responsive assessment as a key driver for measuring academic achievement
- A reconceptualization of assessment as for and of learning
- Reflection questions to stimulate discussion around assessment policies and practices to maximize opportunities for teacher input and student engagement

This book is an essential resource for pre-service and in-service teachers, educator teams, and school leaders striving toward equity in every classroom In this exciting practitioner-friendly volume Margo Gottlieb shows us how assessment as for and of learning can provide a level playing field for today's language learners Educators working with English language learners will find this assessment 'moxie' book truly invaluable W James Popham, Professor Emeritus, University of California, Los Angeles There are no other books available that cover the topic of fair and equitable assessment practices for English learners as comprehensively as this one Nor are there any other books with such a rich selection of tools readily available for practitioners It must belong in every TESOL professional's library Andrea Honigsfeld, Associate Dean and EdD Program

Director, Molloy College **Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions** Francesco Silvestri, Nicola Moraci, 2019-10-22 *Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions* contains invited keynote and theme lectures and regular papers presented at the 7th International Conference on Earthquake Geotechnical Engineering, Rome, Italy, 17-20 June 2019 The contributions deal with recent developments and advancements as well as case histories, field monitoring, experimental characterization, physical and analytical modelling, and applications related to the variety of environmental phenomena induced by earthquakes in soils and their effects on engineered systems interacting with them The book is divided into the sections below:

- Invited papers
- Keynote papers
- Theme lectures
- Special Session on Large Scale Testing
- Special Session on Liquefaction Projects
- Special Session on Lessons learned from recent earthquakes
- Special Session on the Central Italy earthquake
- Regular papers

Earthquake Geotechnical Engineering for Protection and Development of Environment and Constructions provides a significant up-to-date collection of recent experiences and developments and aims at engineers, geologists, and seismologists, consultants, public and private contractors, local, national, and international authorities, and to all those involved in research and practice related to Earthquake Geotechnical Engineering **The Dynamics of Opportunity in America** Irwin Kirsch, Henry Braun, 2016-01-22 Across the country, our children are beginning life from very different starting points. Some

have aspirations and believe they can be achieved For too many others aspirations are tempered if not dashed by the sobering realities of everyday life These different starting points place children on distinctly different trajectories of growth and development ultimately leading to vastly different adult outcomes How did we get to a place where circumstances of birth have become so determinative And what must we do within communities and across our country to better equalize opportunity for more Americans both young and old The editors of this volume contend that if as a nation we do nothing then we will continue to drift apart placing an unsustainable strain on the nation s social fabric and the character of its democracy Consequently understanding the dynamics governing the distribution and transmission of opportunity and transforming this understanding into policies and programs is critical for not only the life outcomes of individual Americans and their children but also the country as a whole The goal of Educational Testing Service s Opportunity in America initiative is to explore these powerful dynamics and to describe and convey them in a way that advances the national conversation about why we must take action and how best to do so This volume contains 14 chapters including an epilogue written by leaders from a range of fields including education economics demography and political science Collectively they not only illuminate key aspects of the problem but also offer suggestions of what policies programs and changes in practices could begin to reverse the trends we are seeing Written in an engaging style this volume constitutes an essential foundation for informed discussion and strategic analysis
