Let There Be Light! Robert S. Dutch, 2017-06-16 Have you ever wondered what it is like to work on a nuclear power plant Robert Dutch worked in the UK's nuclear industry for many years as a scientist and then as a tutor at a nuclear training center He also holds degrees in theology Drawing upon his qualifications and experience Robert addresses the controversial issue of nuclear power from a Christian perspective In contrast to a negative nuclear narrative often portrayed he presents a positive nuclear narrative alongside other ways of generating electricity Be prepared to be challenged to think seriously about nuclear's merits in providing clean low carbon electricity *Data Management for Researchers* Kristin

Briney, 2015-09-01 A comprehensive guide to everything scientists need to know about data management this book is essential for researchers who need to learn how to organize document and take care of their own data Researchers in all disciplines are faced with the challenge of managing the growing amounts of digital data that are the foundation of their research Kristin Briney offers practical advice and clearly explains policies and principles in an accessible and in depth text that will allow researchers to understand and achieve the goal of better research data management Data Management for Researchers includes sections on The data problem an introduction to the growing importance and challenges of using digital data in research Covers both the inherent problems with managing digital information as well as how the research landscape is changing to give more value to research datasets and code The data lifecycle a framework for data's place within the research process and how data's role is changing Greater emphasis on data sharing and data reuse will not only change the way we conduct research but also how we manage research data Planning for data management covers the many aspects of data management and how to put them together in a data management plan This section also includes sample data management plans Documenting your data an often overlooked part of the data management process but one that is critical to good management data without documentation are frequently unusable Organizing your data explains how to keep your data in order using organizational systems and file naming conventions This section also covers using a database to organize and analyze content Improving data analysis covers managing information through the analysis process This section starts by comparing the management of raw and analyzed data and then describes ways to make analysis easier such as spreadsheet best practices It also examines practices for research code including version control systems Managing secure and private data many researchers are dealing with data that require extra security This section outlines what data falls into this category and some of the policies that apply before addressing the best practices for keeping data secure Short term storage deals with the practical matters of storage and backup and covers the many options available This section also goes through the best practices to insure that data are not lost Preserving and archiving your data digital data can have a long life if properly cared for This section covers managing data in the long term including choosing good file formats and media as well as determining who will manage the data after the end of the project Sharing publishing your data addresses how to make

data sharing across research groups easier as well as how and why to publicly share data This section covers intellectual property and licenses for datasets before ending with the altmetrics that measure the impact of publicly shared data Reusing data as more data are shared it becomes possible to use outside data in your research This chapter discusses strategies for finding datasets and lays out how to cite data once you have found it This book is designed for active scientific researchers but it is useful for anyone who wants to get more from their data academics educators professionals or anyone who teaches data management sharing and preservation An excellent practical treatise on the art and practice of data management this book is essential to any researcher regardless of subject or discipline Robert Buntrock Chemical Information Bulletin
