

INTRODUZIONE

La presente Nota Tecnica fornisce informazioni generali di installazione ed uso relativamente al regolatore Marelli Motori a cui codice è riportato nel presente documento, montato su generatori Marelli Motori del tipo indicato nel paragrafo "APPLICAZIONE" (che segue).

Prima di avviare il generatore o di effettuare qualsiasi tipo di operazione sulla regolazione, leggere con attenzione e nella loro interezza tutte le istruzioni contenute nella presente Nota Tecnica.

NOTA IMPORTANTE: Non è intenzione della presente Nota Tecnica coprire tutte le possibili varianti applicative o d'installazione, né fornire dati o informazioni a supporto di ogni possibile contingenza. Gli schemi di collegamento forniti con il generatore, il Manuale d'Uso e Manutenzione dello stesso e le eventuali informazioni aggiuntive fornite da personale tecnico qualificato Marelli Motori integrano e completano la presente Nota.

In particolare, gli schemi riportati in questo documento forniscono solo un esempio della modalità di collegamento e funzionamento del dispositivo, essi non coprono tutti i possibili casi applicativi e non sostituiscono gli schemi di collegamento normalmente forniti con il generatore.

Se dovessero rendersi necessarie ulteriori informazioni sull'applicazione, rivolgersi al Servizio Marelli di Assistenza Clienti. I cui dati di riferimento sono riportati a fondo pagina.

PRECAUZIONI DI SICUREZZA

ATTENZIONE: quando la scheda di regolazione è alimentata (macchina in rotazione) è presente una tensione letale per l'uomo sulle parti superiori del dispositivo (foto connessioni) e su tutte le parti elettricamente connesse ad esse. Sono inoltre presenti sulla scheda componenti che possono raggiungere durante il normale esercizio delle temperature elevate e pericolose per l'uomo in caso di contatto diretto.

Qualsiasi operazione su cablaggi ed installazione meccanica del regolatore deve essere svolta da personale qualificato e informato, il generatore fermo e assicurandosi che ci sia stato un tempo sufficiente al componente di regolazione per recuperare una temperatura di sicurezza.

Qualsiasi operazione di manutenzione deve essere svolta, con macchina in funzionamento e ferma, da personale qualificato e informato, utilizzando strumenti isolati e garantire la sicurezza elettrica (ad esempio cacciavite isolati) e indossando tutti i dispositivi di protezione individuale necessari (in particolare occhiali e guanti di protezione).

Marelli Motori declina ogni responsabilità per danni al regolatore, all'impianto o alle persone, o per mancata gestione o perdita di servizi, o fermo di impianti, causati dall'insufficiente delle istruzioni di sicurezza o/o di installazione/utilizzo riportate nella presente Nota Tecnica.

INTRODUCTION

This Technical Note provides general installation and operating information exclusively concerning the Marelli Motori regulator code specified in the document, mounted on the Marelli Motori synchronous generators specified in the next paragraph "APPLICATION".

Before the generator start and any type of regulation operation, read carefully and completely this Technical Note.

IMPORTANT NOTE: It is not the intention of this document to cover all the installation or connection diagram variations, nor does this manual provide information for every possible contingency. The connection drawings provided with the generator, the generator user manual and all the technical information provided by Marelli Motori Technical Personnel can integrate this Note.

In particular, the connection drawings into this document are provided only for explanation purposes. They do not cover all the application cases and not substitute the connection drawings usually provided with the generator.

Should further information be required, please contact After Sales Department (see the references at the end of the page).

SAFETY PRECAUTIONS

WARNING: when the regulation device is energized (generator running), a lethal voltage is present at the top panel (connection side) and at all the parts electrically connected to it. Furthermore, there are components into the board that can reach high working temperatures, with high danger for the user in case of direct contact.

Every wiring and/or mechanical installation operation on the regulator must be performed only in generator stop conditions, and only by skilled personnel. Furthermore, pay attention to wait a time interval sufficient for the device cooling-down.

Every regulation setting operation must be performed with generator running in no load conditions, by skilled personnel, using tools suitable to ensure the user safety (i.e. isolated screwdriver, protection glasses and gloves).

Marelli Motori is under no liability for any damages which may occur to the AVR, the plant or the persons, or for lost earnings, or financial loss, or system stoppages, due to missed out Technical Note reading (both safety and installation/operating instructions).
