Kenneth A. Shaw, 2013-10-15 Many process management books focus on manufacturing applications. A few discuss services applications and occasionally some comment on the information processes outside of the normal information technology IT function. When a business seeks to improve the processes it uses in order to provide efficiency and cost savings to a product or service that business needs to consider its manufacturing service and information handling processes together because they are not independent. This book has two goals: First to help business practitioners integrate their management of manufacturing or service processes with information processes and second to provide business schools with a textbook that can be used for a basic process management course to precede or accompany the typical operations management course. Because information handling approaches vary considerably with organizational size, both large and small business approaches are discussed. This discussion is focused on basic concepts rather than specific technical aspects like what type of information hardware to be used. One chapter will discuss the considerations necessary when adding information process management to enterprise resource planning (ERP), statistical process control (SPC), and supply chain logistics approaches from both large and small business perspectives. *Proceeding of the 7th International Conference on Logistics Operations Management, GOL'24* Youssef Benadada, Fatima-Zahra Mhada, Jaouad Boukachour, Fatima Ouzayd, Ahmed El Hilali Alaoui, 2024-09-20 This book presents the advances in the concept, model, method, and tools for the global supply chain management. The conference took place in Marrakesh from May 2 to May 4, 2024. The 7th edition of this conference focused on Smart, Sustainable, and Green Logistics. The papers included in the book's proceedings cover various themes such as: Metaheuristics for industry 4.0, Multi-agent systems for solving combinatorial optimization problems, Sustainability in supply chain management, a paradigm for global transformation, Sustainable and agile supply chain management, Sustainable and smart management of water resources, innovative optimization, Artificial intelligence and emerging technologies, advancements and applications, Artificial intelligence techniques and statistical modeling for mobility and urban logistics planning, Smart and green process in transport and logistics, Viability of logistics networks, structural dynamics and recovery strategy, low certainty context, Modeling, simulation, and optimization, Planning and scheduling, Decision support systems, Risk management, Project management, Information systems integration, Supply chain design and control, Models and algorithms for electric mobility. *Development Challenges, South-South Solutions: March 2014 Issue* David South, Writer, 2014-03-05 Development Challenges South-South Solutions is the monthly e-newsletter of the United Nations Office for South-South Cooperation in UNDP. www.southerninnovator.org It has been published every month since 2006. Emerging Solutions for Future Manufacturing Systems Luis M. Camarinha-Matos, 2006-01-04 Industries and particularly the manufacturing sector have been facing difficult challenges in a context of socio economic turbulence characterized by complexity as well as the speed of change in causal interconnections in the socio economic environment In order to respond to these challenges companies are forced to seek new technological and organizational solutions In this context two main characteristics emerge as key properties of a modern automation system agility and distribution Agility because systems need not only to be flexible in order to adjust to a number of a priori defined scenarios but rather must cope with unpredictability Distribution in the sense that automation and business processes are becoming distributed and supported by collaborative networks Emerging Solutions for Future Manufacturing Systems includes the papers selected for the BASYS 04 conference which was held in Vienna Austria in September 2004 and sponsored by the International Federation for Information Processing IFIP
