Dialectical Materialism Gustav A. Wetter, 2024-11-26 Dialectical Materialism 1958 surveys the history of dialectical materialism from its Hegelian beginnings to the death of Stalin and its sequel in the celebrated XXth Party Congress of the C P S U It also presents a systematic account of the theory as it was formulated and discussed by the philosophers of the Soviet Union

Reality and Negation - Kant's Principle of Anticipations of Perception Marco Giovanelli, 2010-11-18 Kant in the Critique of pure reason only dedicates a few pages to the principle of Anticipations of Perception and only a few critical studies are outspokenly dedicated to this issue in recent critical literature But if one considers the history of post Kantian philosophy one can immediately perceive the great importance of the new definition of the relationship between reality and negation which Kant s principle proposes Critical philosophy is here radically opposed to the pre critical metaphysical tradition Reality no longer appears as absolutely positive being which excludes all negativity from itself and negation is not reduced to being a simple removal the mere absence of being Instead reality and negation behave as an equally positive something in respect to one another such that negation is itself a reality that is actively opposed to another reality Such a definition of the relation between reality and negation became indispensable for post Kantian Philosophy and represents a central aspect of Kantian inspired philosophy in respect to Leibnizian metaphysics The present work therefore departs from the hypothesis that the essential philosophical importance of the Anticipations of Perception can only be fully measured by exploring its impact in the Post Kantian debate

Bradford A. Anderson, 2020-06-22 Throughout history the study of sacred texts has focused almost exclusively on the content and meaning of these writings Such a focus obscures the fact that sacred texts are always embodied in particular material forms from ancient scrolls to contemporary electronic devices Using the digital turn as a starting point this volume highlights material dimensions of the sacred texts of Judaism Christianity and Islam The essays in this collection investigate how material aspects have shaped the production and use of these texts within and between the traditions of Judaism Christianity and Islam from antiquity to the present day Contributors also reflect on the implications of transitions between varied material forms and media cultures Taken together the essays suggests that materiality is significant for the academic study of sacred texts as well as for reflection on developments within and between these religious traditions This volume offers insightful analysis on key issues related to the materiality of sacred texts in the traditions of Judaism Christianity and Islam while also highlighting the significance of transitions between various material forms including the current shift to digital culture **Technological Concepts and Mathematical Models in the Evolution of Modern Engineering Systems**

Mario Lucertini, Ana Millàn Gasca, Fernando Nicolò, 2012-12-06 M LUCERTINI A MILLAN GASCA AND F NICOLÒ 1 Technology as Knowledge The Case of Modern Engineering Systems In recent years scholars coming from the fields of history and philosophy of science and technology have devoted much attention to the problem of technology as knowledge and to the emergence of an autonomous engineering science in the Industrial Age This interest echoes a growing awareness among engineers of the independence of their conceptual approach with respect to other forms of knowledge linked to the consolidation of autonomous academic engineering research in the 20th century A careful examination of the nature of technological knowledge appears particularly valuable in view of the pervasive presence of technology in contemporary life and culture not only as a result of its impressive achievements but through the less obvious influence of its concepts and viewpoints as well The activity of engineers and technicians has been traditionally based on the practical ability to cope with specific situations and to attain the corresponding specific goal by means of the design and realization of an artifact or structure on the basis of past experience handed down by tradition and applied by means of trial and error and rule of thumb

Throughout the Universe Isaac Winter Heysinger,1894 When Titans Clashed David M. Glantz,Jonathan M. House,2015-10-16 On first publication this uncommonly concise and readable account of Soviet Russia's clash with Nazi Germany utterly changed our understanding of World War II on Germany's Eastern Front immediately earning its place among top shelf histories of the world war Revised and updated to reflect recent Russian and Western scholarship on the subject much of it the authors own work this new edition maintains the 1995 original's distinction as a crucial volume in the history of World War II and of the Soviet Union and the most informed and compelling perspective on one of the greatest military confrontations of all time In 1941 when Pearl Harbor shattered America's peacetime pretensions the German blitzkrieg had already blasted the Red Army back to Moscow Yet less than four years later the Soviet hammer and sickle flew above the ruins of Berlin stark symbol of a miraculous comeback that destroyed the Germany Army and put an end to Hitler's imperial designs In swift and stirring prose *When Titans Clash* provides the clearest most complete account of this epic struggle especially from the Soviet perspective Drawing on the massive and unprecedented release of Soviet archival documents in recent decades David Glantz one of the world's foremost authorities on the Soviet military and noted military historian Jonathan House expand and elaborate our picture of the Soviet war effort a picture sharply different from accounts that emphasize Hitler's failed leadership over Soviet strategy and might Rafts of newly available official directives orders and reports reveal the true nature and extraordinary scale of Soviet military operations as they swept across the one thousand miles from Moscow to Berlin featuring stubborn defenses and monumental offensives and counteroffensives and ultimately costing the two sides combined a staggering twenty million casualties Placing the war within its wider context the authors also make use of recent revelations to clarify further the political economic and social issues that influenced and reflected what happened on the battlefield Their work gives us new insight into Stalin's political motivation and Adolf Hitler's role as warlord as well as a better understanding of the human and economic costs of the war for both the Soviet Union and Germany While incorporating a wealth of new information *When Titans Clashed* remains remarkably compact a tribute to the authors determination to make this critical chapter in world history as accessible as it is essential *Eurasian Philosophy and Quantum Metaphysics* Juan Valdez,2019-01-15 *Eurasian Philosophy and Quantum Metaphysics* Theology Reconsidered By Juan Valdez The science of our modern age is able to neither address nor solve our current global problems Author Juan Valdez believes we should study humanity's ancient wisdom and philosophy texts to develop a new intellectual paradigm that can respond and support our current needs *Eurasian Philosophy and Quantum Metaphysics* Theology Reconsidered is an in depth study of the origins and meanings of ancient philosophies before they were fractured into mythology and religions and attacked by modern science Beginning with creation mythology in Eurasia through the development of philosophical thought

to the Scientific Revolution to our own modern Quantum Era the progression and abandonment of ancient wisdom is carefully studied Valdez reviews and analyzes the ancient texts themselves to understand what they truly say and not what later historians have said about them The Indo Aryan Vedas the Torah Rene Descartes Discourse on the Method and Principles of Philosophy Neils Bohr s Atomic Theory and more are all respectfully and critically assessed As enlightened as we may consider ourselves Valdez calls attention to how limited modern thought has become By reviewing past wisdom we can not only rediscover the roots of modern thought but place Wisdom itself at the top of intellectual pursuits Eurasian Philosophy and Quantum Metaphysics Theology Reconsidered is a rich and nuanced study on how humanity has thought of itself

Modality in Grammar and Discourse Joan L. Bybee, Suzanne Fleischman, 1995-01-01 This volume brings together a collection of 18 papers that look into the expression of modality in the grammars of natural languages with an emphasis on its manifestations in naturally occurring discourse Though the individual contributions reflect a diversity of languages of synchronic and diachronic foci and of theoretical orientations all within the broad domain of functional linguistics they nonetheless converge around a number of key issues the relationship between mood and modality the delineation of modal categories and their nomenclature the grounding of modality in interactive discourse the elusive category irrealis and the relationship of modal notions and categories to other categories of grammar

Authority, State and National Character Helmut Kuzmics, Roland Axtmann, 2017-03-02 This book presents a cross disciplinary and methodologically innovative study combining historical macro sociology and a sociology of emotions with historical anthropology and cultural studies Drawing on the concepts and theories of Norbert Elias on the Civilizing Process it sets out to pin down and compare qualities that are simultaneously instantly recognisable and highly elusive that is a kind of typical Englishness and of Austrianness that developed contemporaneously in the period up to the First World War The authors chart the development of political authority structures in their varied historical manifestations as well as their affective sedimentation as collective habitus national character comparing England and Austria from 1700 to 1900 as a case study Their argument is based on an analysis of literary sources mainly novels and plays applying a sociology of literature approach Axtmann and Kuzmics argue that the very different national characters formed in England and Austria during this time are related to differences in the affective experience of power and powerlessness in short of authority They show that the formation of national character is determined partly by the different mixture of authoritative external constraints and milder self restraint and partly by the affective experience of human beings in uneven power balances Specifically they show how the formation of the bureaucratic state with strong patrimonial features in Austria and of a self organizing civil society with strong bourgeois liberal features in England resulted both in different institutional structures of authority and in different modes of the affective experience of this authority Employing empirical detail of individual cases and texts to analyse and illuminate broad processes the authors reach a clearer and deeper understanding of seemingly intangible and irrational aspects of national identity

Communicative Mind Line Brandt, 2013-11-04 Integrating research in linguistics, philosophy, semiotics, neurophenomenology and literary studies. *The Communicative Mind* presents a thought provoking and multifaceted investigation into linguistic meaning construction. It explores the various ways in which the intersubjectivity of communicating interactants manifests itself in language structure and use and argues for the indispensability of dialogue as a semantic resource in cognition. The view of the mind as highly conditioned by the domain of interpersonal communication is supported by an extensive range of empirical linguistic data from fiction, poetry and written and spoken everyday language including rhetorically creative metaphors and metonymies. The author introduces Cognitive Linguistics to the notion of enunciation which refers to the situated act of language use and demonstrates the centrality of subjectivity and turn taking interaction in natural semantics. The theoretical framework presented takes contextual relevance, viewpoint shifts, dynamicity and the introduction into discourse of elements with no real world counterparts, subjective motion, fictivity and other forms of non actuality to be vital components in the construction of meaning. The book engages the reader in critical discussions of cognitive linguistic approaches to semantic construal and addresses the philosophical implications of the identified strengths and limitations. Among the theoretical advances in what Brandt refers to as the cognitive humanities is Fauconnier and Turner's theory of conceptual integration of mental spaces which has proved widely influential in Cognitive Poetics and Linguistics offering a philosophy of language bridging the gap between pragmatics and semantics. With its constructive criticism of the general mechanism hypothesis according to which blending can explain everything from the origin of language to binding in perception, Brandt's book brings the scope and applicability of Conceptual Integration Theory into the arena of scientific debate. The book contains five main chapters entitled: Enunciation, Aspects of Subjectivity in Meaning Construction, The Subjective Conceptualizer, Non actuality in Construal, Conceptual Integration in Semiotic Meaning Construction, Meaning Construction in Literary Text and Effects of Poetic Enunciation, Seven Types of Iconicity.

Self-organization of Matter Christian Jooss, 2020-07-06 Self organization of matter is observed in every context and on all scales from the nanoscale of quantum fields and subatomic particles to the macroscale of galaxy superclusters. This book analyzes the wide range of patterns of organization present in nature highlighting their similarities rather than their differences. This unconventional approach results in an illuminating read which should be part of any Physics student's background.
