Modern Web Development with Go Dušan Stojanović, 2023-03-02 Build fast scalable web server applications by harnessing the power of solution driven programming with Go

KEY FEATURES Understanding the core concepts of the Go programming language Designing and development of modern Web Server applications Dealing with different kinds of database management solutions Deploying applications with cutting edge technologies Monitoring and maintenance of applications with popular tools

DESCRIPTION In this book we are going to learn how to design develop and deploy Web Server Applications using the Go programming language In recent years Go has become the industrial standard for these kinds of applications so by learning this a lot of good opportunities can be opened in the market All subjects will be covered through various practical examples This book will cover the state of the art technology for the development of Web Applications and follow all industrial standards At the beginning we will do the preparation for development Here we will learn the basics of the Go programming language the basics of Web Servers how to set up a project with Go and how to design software solutions Later we will concentrate more on development We will learn how to develop the application designed in the previous chapters how to use different types of databases how to test our application and how to make it secure At the end of the book we will show how to deploy the application and monitor it after deployment After reading this book the readers can independently develop Web Server Applications or include themselves in already started projects

WHAT WILL YOU LEARN Solve common problems with the Go programming language Be familiar with the terms related to server applications Understand the phases in the software development process Be able to independently design software solutions and use some best practices Be familiar with multiple different database management solutions relational and NoSQL and be able to predict which best suits their needs Learn how to deploy applications Understand and know how to apply monitoring and alerting concepts

WHO THIS BOOK IS FOR The book is for beginners and experienced developers who want to learn and have a thorough introduction to web development using the Go programming language With a lot of practical examples and guidelines on how to install and configure specific tools beginners will easily understand and follow the content covered in this book On the other hand more experienced developers will certainly find some useful tips and tricks

TABLE OF CONTENTS 1 Basic Concepts of Go programming language 2 Advanced Concepts of Go programming language 3 Web Servers 4 Setting up a project with Go programming language 5 Design of Web Applications 6 Application layers 7 Relational databases and Repository layer 8 NoSQL databases and Repository layer 9 Testing 10 Security 11 Deploying Web Application 12 Monitoring and Alerting

Personal Best Margaret Watson, 2013-11-30 The minute Tess Phillips crossed the finish line in the Chicago Marathon her life began to change As the female winner in this year's race she was handed a check for fifty thousand dollars The money would keep her fledgling recycling business afloat for awhile but there was one catch If she wanted to keep the money she had to let a local sports writer shadow her for an entire week

Although Tess didn't mind sharing her training tips she couldn't afford to have a reporter prying into her personal life. Especially a reporter like Nick Bartholomew. With his mocking grin, his aggressive style and his intense blue eyes, Nick wouldn't let one detail slip by. Once Nick started nosing around Tess's business problems, they were sure to leak out. She had to avoid him even if he was the most attractive man she'd ever met. From the start, Nick Bartholomew was not pleased with this assignment. He was sure that Tess Phillips was a complete fraud. No one could win a marathon on their first try. But one look at Tess's clear blue eyes made Nick doubt his reporter's instincts. They weren't the eyes of a hustler. They were too trusting, too vulnerable. If a man stared into Tess Phillips's eyes long enough, he would begin to believe in all sorts of fairy tales. Before he lost his objectivity, Nick had to cut to the chase. It was time to uncover Tess's secret, and he was the best man for the job. Margaret Watson, a star in the world of contemporary romance, grabs you on the opening page and keeps you reading to the happily ever after. New York Times bestselling author Susan Elizabeth Phillips.

Advancing Sports and Exercise via Innovation Garry Kuan, Yu-Kai Chang, Tony Morris, Teo Eng Wah, Rabi'u Muazu Musa, Anwar P. P. Abdul Majeed, 2023-05-31. This book presents the proceedings of the 9th Asian South Pacific Association of Sport Psychology International Congress ASPASP 2022 Kuching, Malaysia, which entails the different sporting innovation themes, namely Applied Sport and Social Psychology, Health and Exercise, Motor Control and Learning, Counselling and Clinical Psychology, Biomechanics, Data Mining and Machine Learning in Sports, amongst others. It presents the state of the art technological advancements towards the aforesaid themes and provides a platform to shape the future direction of sport science, specifically in the field of sports and exercise psychology.

Ultimate Genetic Algorithms with Python Indrajit Kar, Zonunfeli Ralte, 2025-09-22. **TAGLINE** Harness Genetic Algorithms to Build the Next Generation of Adaptive AI. **KEY FEATURES** Step by step tutorials on Genetic Algorithms using PyGAD and DEAP. Real world Genetic Algorithm applications in ML, DL, NLP, CV and RL. Advanced coverage of evolutionary and metaheuristic algorithms. Integration of Genetic Algorithms with generative and agent based AI systems. **DESCRIPTION** Genetic Algorithms (GAs) are nature inspired optimization tools that help AI systems adapt, improve and solve complex problems efficiently. *Ultimate Genetic Algorithms with Python* explains elaborately the fundamentals of GAs to practical Python based implementation using PyGAD and DEAP. The book starts with a solid foundation explaining how evolutionary principles can be applied to optimization tasks, search problems and model improvement. You will also explore GA applications across multiple AI domains: optimizing machine learning workflows, evolving neural network architectures in deep learning, enhancing feature selection in NLP, improving performance in computer vision and guiding exploration strategies in reinforcement learning. Each application chapter includes step by step coding examples, performance comparisons and tuning techniques. The later sections focus on advanced metaheuristics, swarm intelligence and integrating GAs with generative and agent based AI systems. You will also learn how to design self evolving multi agent frameworks, leverage swarm based methods and connect GAs to next gen AI architectures such as Model Context Protocols (MCP). Thus by

the end of the book you will have developed all the skills to design implement and scale GA driven solutions for real world AI challenges Hence evolve your AI solutions start building with Genetic Algorithms today WHAT WILL YOU LEARN Master the fundamentals and components of Genetic Algorithms Implement GAs in Python using PyGAD DEAP and PyTorch Apply GAs for optimization feature selection and neural architecture search Enhance AI workflows in ML DL NLP CV and RL with GAs Explore metaheuristic and swarm based algorithms for complex problem solving Integrate GAs into generative multi agent and self evolving AI systems WHO IS THIS BOOK FOR This book is tailored for data scientists AI ML engineers researchers and advanced students aiming to apply Genetic Algorithms to real world AI challenges It is also best suited for professionals in optimization generative AI and agent based systems Readers should have basic Python programming skills and foundational knowledge of machine learning concepts Hence whether you are a beginner seeking a solid foundation or an experienced practitioner aiming to deepen your expertise in evolutionary computation this handbook provides a practical and in depth resource to enhance your skills and deliver impactful AI solutions

Mastering Search Algorithms with Python Pooja Baraskar, Abhishek Nandy, 2024-07-20 DESCRIPTION In today's era of Artificial Intelligence and the vast expanse of big data understanding how to effectively utilize search algorithms has become crucial Every day billions of searches happen online influencing everything from social media recommendations to critical decisions in fields like finance and healthcare Behind these seemingly straightforward searches are powerful algorithms that determine how information is discovered organized and applied fundamentally shaping our digital interactions This book covers various search algorithms starting with linear and binary searches analyzing their performance and implementing them in Python It progresses to graph traversal algorithms like DFS and BFS including Python examples and explores the A* algorithm for optimal pathfinding Advanced search techniques and optimization best practices are discussed along with neural network applications like gradient descent You will also learn to create interactive visualizations using Streamlit and explore real world applications in gaming logistics and Machine Learning By the end readers will have a

solid grasp of search algorithms enabling them to implement them efficiently in Python and tackle complex search problems with ease

KEY FEATURES Comprehensive coverage of a wide range of search algorithms from basic to advanced Hands on Python code examples for each algorithm fostering practical learning Insights into the real world applications of each algorithm preparing readers for real world challenges

WHAT YOU WILL LEARN Understand basic to advanced search algorithms in Python that are crucial for information retrieval Learn different search methods like binary search and A search and their pros and cons Use Python's visualization tools to see algorithms in action for better understanding Enhance learning with practical examples challenges and solutions to boost programming skills

WHO THIS BOOK IS FOR This book is for software engineers data scientists and computer science students looking to master search algorithms with Python to optimize search algorithms in today's data driven environments

TABLE OF CONTENTS

- 1 Introduction to Search Algorithms
- 2 Linear and Binary Search
- 3 Depth Search and Breadth First Search
- 4 Heuristic Search Introducing A Algorithm
- 5 Advanced Search Algorithms and Techniques
- 6 Optimizing and Benchmarking Search Algorithms
- 7 Search Algorithms for Neural Networks

Global Perspectives in Positive Education Rob Stokoe, 2018-07-18

The common goal of the contributing authors in this publication is to engage learn from and share success in order to energise the positive education movement for the benefit of our young people This is the greatest contribution we can make to the future of our global society and the wellbeing of its citizens We all seek to offer to everyone the potential to achieve success to be purposeful and content contributing positively to their own wellbeing and that of others

Presenting at conferences across Australia Singapore Dubai and the UK has offered a unique insight in to the breadth and quality of Positive Education globally The positive education community encompasses a dedicated and selfless group of individuals researchers practitioners and leaders who are doing great things to help more young people to grow as robust individuals and learners Yet all too often we fail to join the dots to connect the passion and expertise of our global community to share the best of what we do and what we think Sharing are expertise passion and enthusiasm is essential if we are to truly support our young people

The International Positive Education Network IPEN was established in 2014 to promote these values and sharing of insight and expertise Its mission being to promote academics alongside character and wellbeing to connect people and to share best practice worldwide The commitment to these values are exemplified by the writers who have kindly offered their expertise for the good of others from Dr Helen Street Australia to Yukun Zhao in China and Professor Leonid Illushin in Russia Other chapters have come from Dr Abdullah Al Karam KHDA Dubai Professor Andrew Martin Australia and Amba Brown in Singapore
