Robin Barrow

Plato Bloomsbury Library Of Educational Thought:

Plato Robin Barrow,2014-10-23 Plato was the first and most formidable thinker to recognise that education is a fiercely contested concept and to point out what great social and personal issues are at stake in education He articulated a compelling argument for a liberal arts education as something peculiarly befitting free and autonomous beings He understood the centrality of education for human well being and flourishing And he was the first to set forth a systematic theory of education In this text Robin Barrow concisely and convincingly establishes the continuing relevance of Plato s views to debates on such issues as nature vs nurture or genetic inheritance vs social background philosophy vs sophistry or the pursuit of true understanding vs the pursuit of reputation or perhaps simply truth vs politics and the media Questions concerning the fair distribution of education moral education value judgments and human nature are explored along with themes more specifically associated with Plato s philosophy such as the Theory of Ideas The whole is embedded in a clearly presented account of the historical background to Plato s thought

The Philosophy of Education: An Introduction Richard Bailey,2014-10-28 The Philosophy of Education An Introduction encourages the reader to actively engage with the philosophy of education and the carefully selected contributors bring the philosophy of education to life for the reader Each chapter focuses on a particular area of debate and explains the main concepts includes extracts from philosophical writing followed by questions that guide the reader to critically and actively engage with the text guides the reader towards further reading and suggests next steps and more challenging sources or counter pointed arguments The Philosophy of Education An Introduction is essential reading for education students and for trainee teachers on undergraduate and postgraduate programmes It will also appeal to practicing teachers and educationalists who wish to engage with philosophical approaches to contemporary educational issues

Self-Cultivation in Chinese and Greco-Roman Philosophy David Machek,2025-05-15 In early China and ancient Greece self cultivation was considered crucial for leading a flourishing fulfilled life In this cross cultural study David Machek presents and interprets six influential Greek and Chinese self cultivation theories advocated by Mengzi Zhuangzi and Xunzi as well as Plato Aristotle and the Stoics in order to put forward the overarching narrative that self cultivation amounts to strengthening the best part of the human self the heart in the Chinese context and the mind in the Greek context Advancing new readings of classic texts Machek shows that Greek approaches to self cultivation privilege intellectual pursuits while Chinese approaches give more weight to non intellectual activities such as learning manual crafts and performing rituals He also demonstrates how both ancient traditions understand the self as a heterogeneous community of organic entities each needing different provisions to flourish which aligns the ancient Greek view closer to the early Chinese view As such this book reinforces the underlying structural and conceptual similarities between the two traditions and makes an important contribution to diversifying philosophical conversations

Confucius Charlene Tan,2014-10-23 Charlene Tan s text offers a coherent account of Confucius

educational thought and its implications for the modern world Arguing that Confucius is more than an ancient master who emphasised tradition rote learning and teacher centredness Tan portrays Confucius as a progressive educator who challenged the social norms of his time and transformed the nature of teaching and learning in China and beyond Through a textual study of the Analects this text provides a critical exposition of Confucius work particularly with respect to his interpretations of human beings mission in life potentials relationships with one another and educational process Further highlighting the contemporary relevance of Confucius work the author offers a Confucian framework for 21st century education one that harmonises modern knowledge and skills with universal values on shared humanity and loving others

Michel Foucault Lynn Fendler,2014-10-23 Michel Foucault s influential work spanned a wide array of intellectual disciplines his writings having been widely taken up in philosophy history literary criticism and political theory Focusing on the implications of Foucault s theories for education whilst characterizing them as provocative problematizing poetic and playful Lynn Fendler describes the historical context for understanding Foucault s ground breaking critiques Including a discussion of his major theories of disciplinary power genealogy discourse and subjectivity this text provides generative explanations of concepts using analogies to the Internet and to food in order to connect Foucault s theories to everyday experience

Lev Vygotsky René van der Veer,2014-10-23 Lev Vygotsky the great Russian psychologist had a profound influence on educational thought His work on the perception of art cultural historical theory of the mind and the zone of proximal development all had an impact on modern education This text provides a succinct critical account of Vygotsky s life and work against the background of the political events and social turmoil of that time and analyses his cross cultural research and the application of his ideas to contemporary education Ren van der Veer offers his own interpretation of Vygotsky as both the man and anti man of educational philosophy concluding that the strength of Vygotsky s legacy lies in its unfinished open nature

Pierre Bourdieu Michael James Grenfell,2014-10-23 The French social theorist Pierre Bourdieu was a key thinker about education and educational processes in the second half of the twentieth century He made his name in seminal texts such as *The Inheritors* and *Reproduction* in which he analysed academic discourse and showed how differences in cultural capital led to different outcomes for those who passed through school and university His concepts of *Habitus* and *Field* have since been used extensively in educational research This book begins by setting his intellectual development within his own biography and then discusses each of his major works on education in turn from the early studies of students and their learning to later analyses of the French academic space and the elite training colleges There is also critical discussion of a range of commentators views on this approach The book concludes with a series of applications of Bourdieusian thinking on various educational topics teacher education classroom discourse higher education and policy No educational discussion is complete without consideration from a Bourdieusian perspective This book shows how and why

St Thomas Aquinas Vivian Boland OP,2014-10-23 It may be surprising that the thought of a medieval theologian still

informs many areas of intellectual debate but there continues to be lively interest in the work of Thomas Aquinas. He considers the most radical questions for our thinking about education: what is a human being? what does it mean to learn? what does it mean to teach? what does it mean to know? to understand and to search for the truth. In this text Vivian Boland offers a short biography of Aquinas focused on his personal experiences as a student and teacher. The book then provides a critical exposition of the texts in which Aquinas develops his views about education and includes a short account of the reception and influence of his thinking. Finally it considers in some detail the most significant points of contact between Aquinas's educational thought and current concerns: his conviction about the goodness of the world, his holistic understanding of human experience and his contributions to virtue theory and highlights the continuing relevance and influence of this work and thinking within educational philosophy today. *St Augustine* Ryan N. S. Topping, 2014-10-23. After setting Augustine's thought firmly within the context of his life and times, Ryan Topping examines in turn the causes of education, the purposes, pedagogy, curriculum and limits of learning as Augustine understood them. Augustine's towering influence over Medieval and Renaissance theorists from Hugh of St Victor to Aquinas to Erasmus is traced. The book concludes by drawing Augustine into dialogue with contemporary philosophers, exploring the influence of his meditations on higher education and suggesting how his ideas can reinvigorate for our generation the project of liberal learning. **John Dewey** Richard Pring, 2014-10-23. Bertrand Russell's *History of Philosophy* refers to Dewey as generally admitted to be the leading living philosopher of America. This honourable mention lay partly in his pragmatic theory of meaning through which so many baffling philosophical problems were claimed to have been solved as well as educational ones. It is in connection with his educational ideas, however, that Dewey became either famous or infamous. In the United States he had been seen both as saviour of American education by those who welcomed a more child-centred curriculum and yet as worse than Hitler by those who saw his ideas as undermining traditional education, an accusation shared by his detractors in Britain. This account seeks to bring together Dewey's educational thinking and its frequently forgotten foundations in a pragmatic theory of meaning. In so doing, the book seeks to show that John Dewey is a philosopher of education for our time.
