

32.2 Lutheranism

Read Section 32.2. In the corresponding part of the drawing, record at least two key ideas about each of the topics listed below.

- origins of the religion

Lutheranism was founded by Martin Luther in Germany in 1521.

- beliefs about sin and salvation

Lutherans believed that salvation was a gift from God. It was received by people if they sincerely believed in Jesus, were sorry for their sins, and accepted the Bible as truth. Luther called this "justification by faith."

- beliefs about the ultimate source of authority

Lutherans believed that the Bible was the only true source of religious guidance. They rejected the authority of church councils and the pope.

- rituals and worship

Lutherans kept some Catholic practices and added new Lutheran ones. The church looked much like a Catholic Church (with altars, crucifix, and candles). Lutheran services had some similarities to Catholic mass, such as Communion, Bible readings, sermons, and hymns. There were also differences, such as prayers in German instead of Latin and two sacraments instead of seven.

- community life

Luther emphasized strict discipline and large, strong families. Children were taught to pray before meals and bed.

Answers will vary.
Some possibilities are
listed for each topic.

The Official Railway Guide, 1902 **The Official Guide of the Railways and Steam Navigation Lines of the United States, Porto Rico, Canada, Mexico and Cuba**, 1910 **Against the Law** Paul F. Campos, Pierre Schlag, Steven Douglas Smith, 1996 A fundamental critique of American law and legal thought Against the Law consists of a series of essays written from three different perspectives that coalesce into a deep criticism of contemporary legal culture Paul F Campos Pierre Schlag and Steven D Smith challenge the conventional representations of the legal system that are articulated and defended by American legal scholars Unorthodox irreverent and provocative Against the Law demonstrates that for many in the legal community law has become a kind of substitute religion an essentially idolatrous practice composed of systematic self misrepresentation and self deception Linked by a persistent inquiry into the nature and identity of the law these essays are informed by the conviction that the conventional representations of law both in law schools and the courts cannot be taken at face value that the law as commonly conceived makes no sense The authors argue that the relentlessly normative prescriptions of American legal thinkers are frequently futile and indeed often pernicious They also argue that the failure to recognize the role that authorship must play in the production of legal thought plagues both the teaching and the practice of American law Ranging from the institutional to the psychological and metaphysical deficiencies of the American legal system the depth of criticism offered by Against the Law is unprecedented In a departure from the nearly universal legitimating and reformist tendencies of American legal thought this book will be of interest not

only to the legal academics under attack in the book but also to sociologists historians and social theorists More particularly it will engage all the American lawyers who suspect that there is something very wrong with the nature and direction of their profession law students who anticipate becoming part of that profession and those readers concerned with the status of the American legal system
