Real Estate Dynamics 17th Edition:

Real Estate Peter Dent, Michael Patrick, Xu Ye, 2012-10-02 Traditional studies of the property market have tended to focus solely on commercial and legal issues but the growing importance of the issue of sustainability means that a different approach is needed. This new textbook provides an overview of property within a market context, examining the complex nature of property rights and issues related to both investors and occupiers. At the same time, it assesses property from the perspective of financial, social, and environmental sustainability. Topics covered range from the characteristics of property and depreciation to ownership and development, through to investments and sustainability reporting. The book concludes with key skills in sustainable knowledge needed by those working in the real estate industry. Written by an author team of experienced property professionals, this essential introductory textbook is well suited for property planning and architecture students on undergraduate, graduate, and conversion courses, as well as those on CPD and training programmes in related areas.

Concepts of Value in European Material Culture, 1500-1900 Bert De Munck, Dries Lyna, 2016-03-09 In contemporary society, it would seem self-evident that people allow the market to determine the values of products and services. For everything, from a loaf of bread to a work of art to a simple haircut, value is expressed in monetary terms and seen as determined primarily by the objective interplay between supply and demand. Yet this price mechanism is itself embedded in conventions and frames of reference which differed according to time, place, and product type. Moreover, the dominance of the conventions of utility maximising and calculative homo economicus is a relatively new phenomenon, and one which directly correlates to the steady advent of capitalism in early modern Europe. This volume brings together scholars with expertise in a variety of related fields, including economic history, the history of consumption and material culture, art history, and the history of collecting, to explore changing concepts of value from the early modern period to the nineteenth century and present a new view on the advent of modern economic practices. Jointly, they fundamentally challenge traditional historical narratives about the rise of our contemporary market economy and consumer society. World Heritage Patinas

Rodrigo Christofoletti, Marcos Olender, 2021-05-03 This book presents studies on the management of the Brazilian world heritage and its international counterparts, relating its preservationist practices to the risks and alerts that run its maintenance in the face of so many challenges in the contemporary world. The book has encouraged scholars from a wide variety of disciplines to contribute their valuable knowledge to research on the management and risks of Brazil's world heritage. It is a bold initiative that brings together contemporary studies on management, alerts, and risks of the Brazilian world heritage and some international examples. It stands out not only for its interdisciplinary approach but above all for compiling a wide range of approaches that analyze various dimensions of world heritage management. Unique experience in the management of world heritage allocated to Brazilian territory: this book was written by prominent academics and heritage management professionals and includes national and international case studies. It is a comprehensive academic book.

in Brazilian world heritage management literature and can therefore be used as an authoritative reference source as well as a significant teaching tool
