Least Action Principle of Crystal Formation of Dense Packing Type and Kepler's Conjecture Wu Yi Hsiang,2001 The dense packing of microscopic spheres i.e atoms is the basic geometric arrangement in crystals of mono atomic elements with weak covalent bonds which achieves the optimal known density of B 18 In 1611 Johannes Kepler had already conjectured that B 18 should be the optimal density of sphere packings Thus the central problems in the study of sphere packings are the proof of Kepler's conjecture that B 18 is the optimal density and the establishing of the least action principle that the hexagonal dense packings in crystals are the geometric consequence of optimization of density This important book provides a self contained proof of both using vector
