United States. Marine Corps, 1990 *Textbook of Nursing Education - E-Book* Latha Venkatesan, Poonam Joshi, 2015-10-31 It was a long time desire of nursing fraternity to have a textbook on nursing education that has the content for all the units of the INC prescribed syllabus This book pointedly deals with all the contents specified by the INC curriculum The book has been written keeping in mind the requirements of the modern Indian nurse educators what they need to know and practice in the classroom This book provides comprehensive study material and practice exercises on Nursing Education the way it is used in day to day conversations in the hospital environment Comprehensive exhaustive and well structured coverage Lucid presentation with easy language for ease of comprehension Practical approach with relevant theoretical perspectives answering common questions and issues that arise while learning the subject Ample number of examples tables and other learning aids All the essential elements of communication in modern day nursing practice like nursing reports records etc discussed analysed and exemplified Examples from real life health care communications provided Exhaustive end of chapter exercises Solutions for all objective type exercises given *Industrial Parsing of Software Manuals* Richard F.E. Sutcliffe, 2023-11-27 The task of language engineering is to develop the technology for building computer systems which can perform useful linguistic tasks such as machine assisted translation text retrieval message classification and document summarisation Such systems often require the use of a parser which can extract specific types of grammatical data from pre defined classes of input text There are many parsers already available for use in language engineering systems However many different linguistic formalisms and parsing algorithms are employed Grammatical coverage varies as does the nature of the syntactic information extracted Direct comparison between systems is difficult because each is likely to have been evaluated using different test criteria In this volume eight different parsers are applied to the same task that of analysing a

set of sentences derived from software instruction manuals Each parser is presented in a separate chapter Evaluation of performance is carried out using a standard set of criteria with the results being presented in a set of tables which have the same format for each system Three additional chapters provide further analysis of the results as well as discussing possible approaches to the standardisation of parse tree data Five parse trees are provided for each system in an appendix allowing further direct comparison between systems by the reader The book will be of interest to students researchers and practitioners in the areas of computational linguistics computer science information retrieval language engineering linguistics and machine assisted translation
