Mobile Working Machines Marcus Geimer, 2020-12-31 Mobile Working Machines are defined by three characteristics. These machines have a certain task of doing a working process; they are mobile and they have a significant energy share in their working functions. The machines should be as productive, efficient and of high quality as possible. All these machines in the field of agriculture, forestry, construction, logistics, municipal sector and in other special applications work in different applications. But many technologies placed in the machines are the same, similar or comparable; therefore, different branches can learn from each other. Mobile Working Machines provides a wide and deep view into the technologies used in these machines. Appropriate for new engineers as well as those who wish to increase their knowledge in this field, this book brings together all the latest research and development into one place. **Experimental Hydrostatic Drive Vehicle** Terry A.

Romance Linguistics Vera Mathieu, Julia Montemayor Gracia, Claudia Polzin-Haumann, 2025-06-16. This handbook provides a systematic overview, firstly of the basic concepts and secondly of current research topics and trends in Applied Romance Linguistics from a theoretical, methodological and empirical perspective. It takes account of both traditional and innovative research approaches. Following a general introduction to the field and its major topics, methods and objectives, the presentation is divided into four thematic sections: methods and methodology; language, society and knowledge; language acquisition and language education; specialised communication and transfer. The volume is geared towards researchers, teachers and students working in the fields of linguistic and communication studies, but also addresses the general public. It aims to provide useful information for anyone dealing with problems of language and communication in their professional or private lives and illustrates career options for graduates of Romance Linguistics.
