The E Series Teledyne Continental Aircraft Engines includes all engines of model designations E-165, E-185 and E-225. Dash numbers following the basic model number indicate variations in equipment, as described generally in Table II, to adapt the engines to various types of aircraft. The following description will provide a general idea of the construction of each model and detailed information on the operation of the various engine systems. A close observation of the illustrations will aid in following the descriptions.

Recently, the lower parting flanges of Model E-185 crankcases were made thicker for additional rigidity. This change made it necessary to use longer 5/16 inch attaching bolts, as indicated in the new Parts Catalog. The webs, cast integrally, have enlarged bosses which are line bored to provide seats for crankshaft main bearings and, below them, other bosses which are bored to act as camshaft bearings. The four main webs accommodate four bearings for each shaft. Lead coated, steel backed Tri-Metal precision inserts are installed in the four main bearing seats with the split matching the case parting surface. Each insert is retained by a tang which
