Abstract

13. Many life insurance policies do not expire as written. They usually terminate with your age. These types of insurance policies are not an investment in the cash-value life insurance. The cash-value insurance policies usually do not have a life insurance and the cash-value increases the more. These policies are single and fixed.
14. Cash-value policies are considered as the permanent policies. These policies are like fixed savings accounts. These policies are not paid for a specific time and there they have to be continued and you should have any money invested in it.
15. These benefits of buying permanent insurance policies is that you should stop paying for the term and you should increase.
16. The amount of the policy increases as the amount you have invested in the policy increases. However, if you have an insurance policy for \$100,000 and have a period of time you have invested \$10,000 in that policy, the insurance company, at the end of about 10 years will only be paying \$10,000 for the policy. If the policy has been \$100,000, it will be \$10,000.
